

# Microsoft Learning-as-a-Service (LaaS)

Holistic learning approach for teams and organizations with the Fast Lane LIVE platform

Digital Transformation, along with the evolution of learning styles, has created a need for a more programmatic approach to learning in support of Developers and Architects using Microsoft technologies.

Fast Lane has created Fast Lane LIVE, a digital learning platform and new approach to learning, as a total Learning-as-a-Service offering. Fast Lane LIVE is based on the Open edX Open Source platform and offers seamless access to a comprehensive catalogue of e-learning products and accompanying services.

If you want to qualify your team and accelerate the adoption of new technologies, Fast Lane's LaaS portfolio offers you a solution tailored to your specific business needs.

## Your Benefits with Fast Lane LIVE

- Accelerated adoption of Microsoft solutions
- High-end e-learning catalog on topics such as Microsoft Azure, Data Science, DevOps or Programming
- Customized to specific business goals
- Blended learning offerings
- Tailored for teams and organizations

### Scalable, efficient and cost-effective

- Individual enterprise solutions for teams or entire organizations
- Seamless integration into your systems

### Bespoke enterprise solutions

### Anywhere, anytime and any device

- Flexible learning plans for key technology topics
- Available anytime, anywhere, and on any device

### Seamless access to all e-learning components

### More than just E-Learning

- Learning-as-a-Service (LaaS) packages with individual and collaborative learning options such as expert coaching, labs, assessments or group discussions

### Sustainable learning through interaction

With the Fast Lane LIVE platform, we provide our customers with highly efficient, scalable learning opportunities in the cloud, ranging from individuals to global companies.

Torsten Poels, CEO & Chairman of the Board, Fast Lane
