

CumulusPro Proof of Delivery solution

For the supply chain management

CumulusPro Proof of Delivery solution (POD) helps supply chain management operators to intelligently capture and validate large volumes of delivery notes. Automated delivery notes processing using intelligent capture and A.I. assisted technologies

WHAT OUR CUSTOMERS ARE SAYING

“Using CumulusPro Proof of Delivery solution on Straatos BPM Platform, our delivery notes are quickly digitised, automatically indexed, reconciled and stored in our content management repository. With the automation capabilities of the platform, shipment irregularities are discovered earlier and remedied immediately.”

–**Operation Manager**, The Bakery in Asia

WHAT WE OFFER

Always on-time

Delivery notes are captured, automatically validated, and information are readily accessible to your organisation upon goods delivered.

Increase operational efficiency and productivity

Automatically reconcile digitised delivery notes and address any shipment irregularities immediately. Electronic copy of the delivery notes are easily accessible and retrievable at anytime and from anywhere.

Improve cashflow and reduce DSO period

Managing delivery notes digitally from the start ensures that no information are lost, and data is updated accurately. This enables prompt billing and quick dispute resolution with customers, resulting in better cash flow and a shorter DSO cycle for business.

Improve employee work performance

Replace time-consuming and error prone data entry tasks with intelligent data extraction. Employees will have more time to focus on quality work.
