

# Azure Data Warehouse Simplified

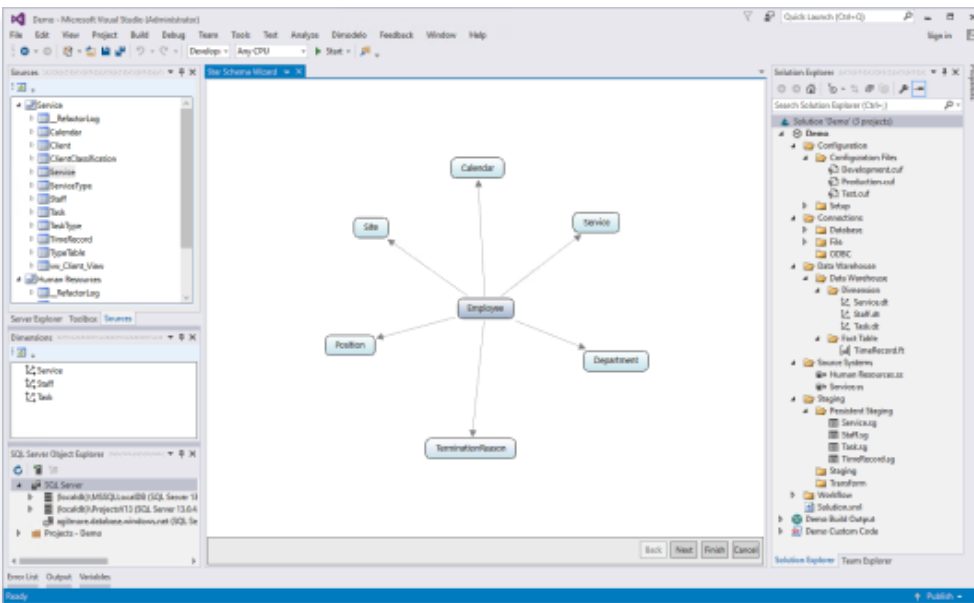

The fast track to an Azure modern Data Warehouse

In today's complex data environment, building a Data Warehouse is difficult. Reduce the risk, effort and cost of building a modern Azure Data Warehouse using Dimodelo Data Warehouse Studio.

## Introducing Dimodelo Data Warehouse Studio

Dimodelo Data Warehouse Studio is a Data Warehouse Automation tool. It reduces the complexity and effort required to build a data warehouse. Using the tool, Developers quickly capture a Data Warehouse design. The design is then combined with prebuilt templates to generate and deploy a modern Data Warehouse optimised for Azure. Developers can quickly iterate, modifying the design, and re-deploying changes as required.

## Reduce Effort, Risk and Cost

- Reduce the effort, risk, cost and complexity of building a Data Warehouse.
- Increase the agility of your Data Warehouse team.
- Reduce technical debt generated by one-off inconsistent data solutions.
- Supports Azure Synapse Analytics, Azure SQL Database, SQL Server.
- Improved productivity.
- Improved business focus.
- Portability across platforms.
- Easy maintenance through change propagation.

## Deliver a Data Warehouse Fast

### An Azure Data Warehouse in days

- Design & Generate instead of hand code
- Reduce effort, risk and cost

## Agile Data Warehouse

### Respond quickly to change

- Change the design, regenerate, then deploy with one click
- Collaborative with daily deployments

## Reduce your Backlog

### Reduce the backlog

- One-off solutions vs easy collaboration on a centralized DW
- Use a Data Warehouse for both core BI and Data Science

In a matter of 1 hour, I have been able to use Dimodelo to perform the transformations and additional metrics I wanted, deployed and tested in UAT... - Nigel Rablin, Business Intelligence Specialist, Bolton Clarke

# Dimodelo Data Warehouse Studio maximizes the value customers derive from Azure Data Platform's scale and elasticity

## Simplicity Multiplied

- Microsoft has simplified the Data Platform
- Dimodelo simplifies how you use it
- Delivery in days

## Scale wisely

- Azure delivers massive scale
- Dimodelo ETL Architecture uses it wisely
- Optimize Azure resources usage

## Hybrid Cloud

- Microsoft leads in Hybrid cloud enablement
- Dimodelo distributes the workload
- Use under-utilized on-prem resources

## Offer:

### Our promise to you

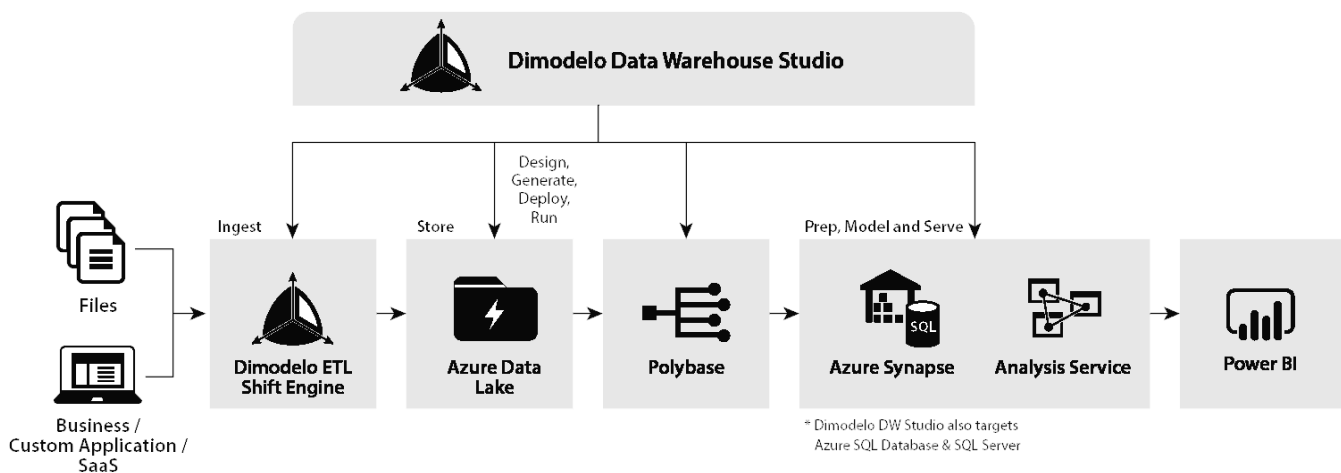

Develop your first Azure modern Data Warehouse in as little as 8 hours.

### An offer to get you started

- Azure Data Warehousing Simplified
- Free 8-hour online training program
- 30 Day Free Trial
- Develop a production ready data warehouse in as little as 8 hours.

## Dimodelo Data Warehouse Studio

Dimodelo Data Warehouse Studio designs, generates, deploys and runs an end to end Azure Data Lake and Azure Synapse Analytics data warehouse solution.

## Dimodelo Solutions

Dimodelo Solutions are experts in Data Warehouse design and development. Years of experience have been distilled into Dimodelo Data Warehouse Studio; a metadata driven Data Warehouse tool. Combine this with the design skills of Dimodelo Solutions personnel to help you deliver a Data Warehouse fast.
