

## Meetings Professional App

### *Now Available for Both iOS and Windows 10 Tablets — Work YOUR Way!*

More than just a content viewer, eSCRIBE Meetings Professional is a real-time application which allows elected officials and other participants to actively engage in meetings.

Connected to the core eSCRIBE Meeting Manager module — which facilitates the building of agendas, minutes, action lists, and provides a platform for adding additional eSCRIBE functionality — the Meetings app makes it possible for your board to go totally paperless.

**The best part: We let your board work the way they want.** Settle the debate between iOS or Windows by letting members choose which platform they are most comfortable with as organizations can mix-and-match of licenses.

### **Benefits**

- Browse upcoming meeting agendas, download content for viewing online or offline;
- Access all related reports and supporting information easily;
- Annotate comprehensively, with private and group comments support;
- Integrated e-voting and request-to-speak management for members;
- Search online resources library for non-meeting specific information; and more.

eSCRIBE Meetings app is available globally for Apple iPad's running iOS 9 or higher, through the Apple App Store, as well as Windows 10 devices through the Microsoft Store.

Raise the technology adoption of your board to streamline your meeting workflows today!

### *Get In Touch for More Information*

eSCRIBE understands each organization is different. Get in touch with us if you'd like to arrange for a demo to see the app in action.
