

ADENTS PRODIGI

THE ONLY CLOUD PLATFORM TO HANDLE REGULATORY REQUIREMENTS AND TURN SERIALIZATION DATA INTO BUSINESS INTELLIGENCE

Unit identification, tracking and tracing imposed by new regulations generate a considerable mass of data. Managing (generating, controlling, storing, archiving and exchanging) serialization data is a huge challenge for the pharmaceutical industry. However, once enhanced and analyzed, this data can be a gold mine for your business.

Adents Prodigy opens up new horizons beyond regulatory compliance in terms of:

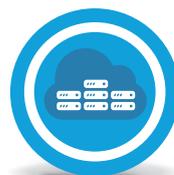

- Unit identification and traceability
- The fight against counterfeiting and gray markets
- OEE and productivity monitoring across production sites
- Enhanced user experience and personalized communication
- Real-time data visualization and analysis

Be compliant with complex regulations

Control your distribution channels & protect your brand

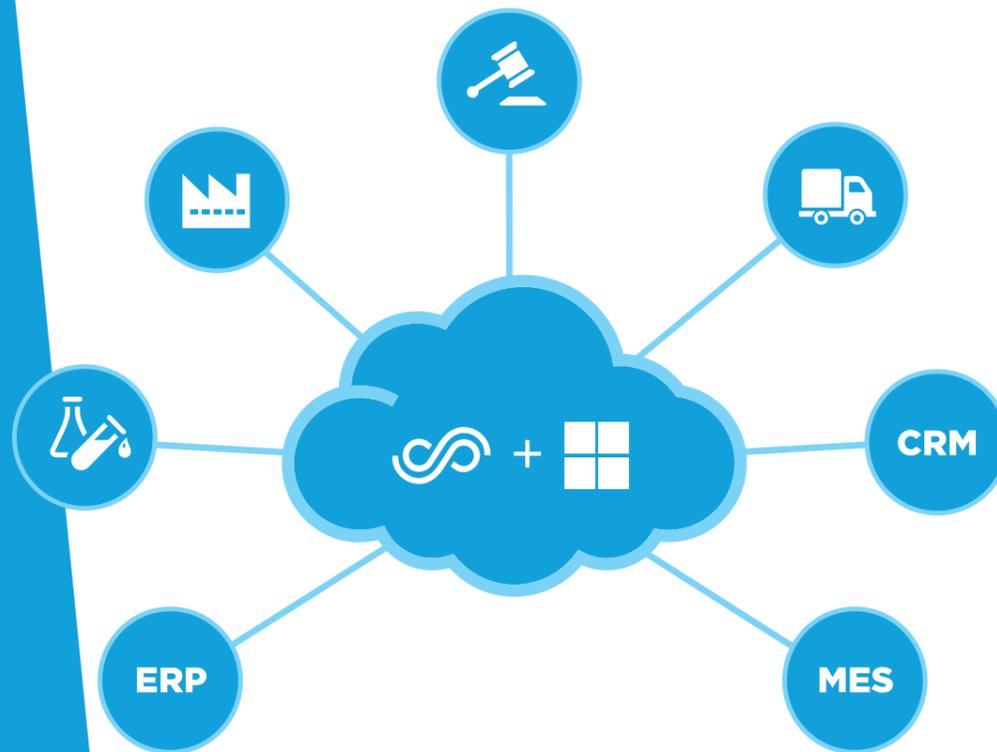

Make your data agile & powerful with latest Cloud technology

Optimize your operational performance

Take your serialization data to the next level

Adents & Microsoft combine their expertise in unit identification and Business Intelligence

ADENTS +  Microsoft

Microsoft, global leader in business intelligence solutions* and Cloud services for enterprise, and Adents, expert for unique product identification (UPID) and track & trace software, **have joined forces to develop an innovative Cloud platform and give companies the means to tap into the full potential of the serialization data.**

Adents' knowledge of international serialization and traceability regulations as well as industrial processes is crucial for this partnership whereas latest Microsoft technology guarantees data security and access control. Microsoft Azure Services such as Power BI and Machine Learning offer powerful Business Intelligence and data analytics capabilities.

* Magic Quadrant for Business Intelligence and Analytics Platforms, Gartner 2016

No matter the serialization solution installed at your sites, with Adents Prodigy you are compliant with data management and security requirements

 GENERATE	<ul style="list-style-type: none"> • Generate or import serial numbers according to regulatory requirements (USA, Europe, South Korea, China, Brazil ...) • Create unique serial numbers at all levels of your packaging line (case, bundle, carton, pallet)
 EXCHANGE	<ul style="list-style-type: none"> • Securely manage information exchange between sites and with suppliers (internal sites, CMOs, Supply Chain, ...) • Assign serial numbers depending on product type and legislation/market across all your sites • Exchange information securely in compliance with standards such as GS1 EPCIS
 COLLECT	<ul style="list-style-type: none"> • Securely collect serialization data from other sites (level 3), even if they are not equipped with an Adents serialization solution • Collect data generated at any level of your supply chain whenever a serial code is scanned
 PROCESS	<ul style="list-style-type: none"> • Time-stamp your data • Control and format data in compliance with data security regulations • Store data securely • Archive and index your data
 REPORT	<ul style="list-style-type: none"> • Securely exchange data with authorities and other data repositories • Log your exchanges

Leverage the business potential of your data

 ENRICH	<ul style="list-style-type: none"> • Structure your serialization data to prepare for BI analyses
 CHECK & VISUALIZE	<ul style="list-style-type: none"> • Search and visualize information in a centralized database (serial number, bundle, aggregation level) • Generate industry reports
 ANALYZE & ENHANCE	<ul style="list-style-type: none"> • Directly access Microsoft Power BI • Analyze your data with external applications through secure APIs

Adents is a software developer specializing in solutions for unique product identification and track & trace. We help brands and companies from all industry sectors adapt to market changes and comply with regulations on traceability.
