Assessment for Microsoft Copilot for M365

How to start with Copilot?

Identify requirements, get to know the AI and use cases
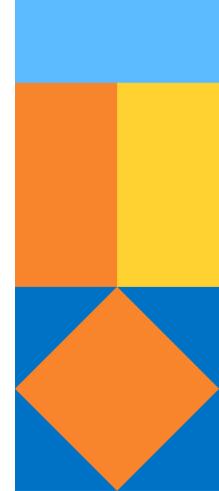

Assessment for Copilot

Copilot is here to stay and in opposite to the IT we know it is not deterministic, it is generative. In opposite to the search we know, there are no "topics" there are prompts or dialogues.

Experiences from the field

Everyone wants Copilot.

But....

There is no clear understanding of the requirements, targets or adoption measures.

Microsoft Designer Prompt: Add an image of a crowd in a concert settings that is screaming while a Copilot Logo is singing on stage
