Innofactor TeamsMate

Automated Teams Generation

- Highly customizable Team Templates for each purpose
- Automated team generation based on your templates
- Tabs, apps, channels, and folders pre-populated according to your specification
- Settings and permissions
- Minimum two owners to secure continuation

Enforcing Team Naming Conventions

- Shared and enforced naming conventions
- Limited naming options in New Team Request Form utilizing for example prefixes and suffixes giving you full control on how teams are being named
- Easier access to information and data with consistent naming

Team Lifecycle Management

- Predefined lifecycle for all teams based on the team template
- Notifications to team owners and administrators on approaching end-of-life of teams.
- Automatic archiving procedures after approval of E.O.L.
- Eliminate passive and forgotten teams to avoiding clutter and confusion.

Intelligent Bots

- Supports remote working by suggesting solutions for the most common remote work issues based on data
- Q&A materials that can be easily edited and enhanced
- Especially helpful, to support fast-paced-changes in the remote working environment
