MATRIX42

Increase Employee Experience with O365 & Azure Workspace

MyWorkspace is simple, secure, device independent access and provisioning solution for the end users workspace including O365 & Azure.

What is MyWorkspace?

MyWorkspace combines web and cloud app integration, remote desktop services, identity management, enterprise mobility management, and license management. With this unique feature set, MyWorkspace allows IT to provide a great employee experience. This ensures that IT retains full control over which users can access which apps and files, and from what kind of device.

Why customers use MyWorkspace

This at-a-glance box

- Increase employee experience through a device independent workspace

- Easy and secure access through Azure Active Directory

- O365 & Azure license compliance through IT-controlled deployment

Easy & Secure Access

- Reliable user on-and offboarding workflows

- Controlled access to organizations workspace

- Enforce of security compliance rules

IT provide a secure and compliant workspace

Happy End-user

- One password fits all

- Prevents URL madness

- Access to the workspace from everywhere

With a single-sign-on the user gets access to his workspace

Full Control

- Integrates seamlessly into existing Microsoft infrastructure

- Pre configured cloud, SaaS & mobile apps

- Optimization of the Cloud/SaaS license model

IT gets full control about usage of Azure & O365 apps.

With MyWorkspace we roll-out our Microsoft-based workspace including O365-Applications and Azure Apps in half of time.

Thorsten Green, CIO, Diva-e
