Azure services for premium video workflows

The VodFlow solution enabled Tunisie Telecom to perfectly and quickly go live with Hayya.tn Redbull video Portal which addressed millions of our customers.

- Ilyes BelHadj Hassine, IT Manager, Tunisie Telecom

How VodFlow works, to achieve business benefits

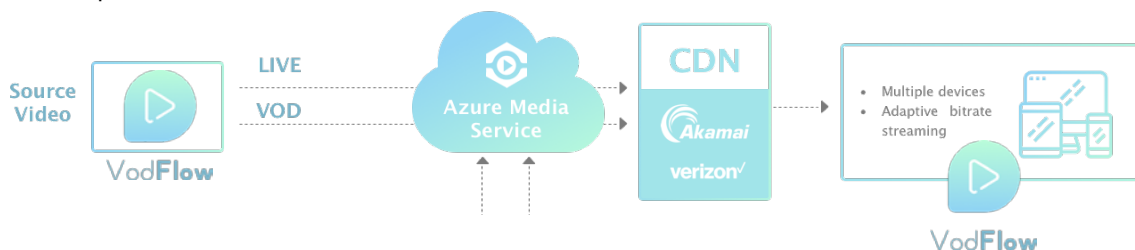

- According to a study conducted by eMarketer, video viewing will continue to grow worldwide, reaching around 2.38 billion viewers per month, across all devices, in 2018
- online video consumption is continuously and significantly increasing, with a forecast to reach up to 80% of the overall internet traffic by 2022
- Companies in need of smooth and adaptive video streaming solutions have to deal with significant and complex issues, among them : securing content, billing for access, ensuring fault tolerance, delivering with low latency, meeting the expectations of viewers, tracking how long each viewer watched your videos, and more.

VodFlow on Azure

- VodFlow is hosted on a highly scalable Azure environment, and it is powered by Azure Media Service which gives you broadcast-quality video streaming services to reach larger audiences on today's most popular mobile devices
- Our customers was able to go live in less than 1 week
- A smooth and easy workflow for a fully branded video portal
