A platform built upon Azure for teamwork

Nimbulis unleashes unprecedented operational efficiency by integrating **applications** + **workflow** + **data** + **real-time communication** into mission-critical **Intelligent Business Management Platform**.

"Effectively, change is almost impossible without industry-wide collaboration, cooperation, and consensus." – Simon Mainwaring

A cohesive platform which enables the aggregation of workflow via line of business functions to streamline positive business outcomes for people, process, and partners.

Nimbulis is a technology platform that enables business operations to simplify the aggregation and organization of everyday workflows to deliver positive business outcomes for people, process, and partners. Each User experiences their own personalized "Workspace" with the data they need in one secure place, configured for their roles and responsibilities, and available when they're in the office or mobile.

Intelligent Business Hub Powered by Nimbulis helps you to...

ENHANCE: Manage tools, Applications and Communication in a single platform

5x more likely to be high performance company when employees are Empowered

Nimbulis empowers you to leverage all the other tools and services you use every day to get your job done. Nimbulis is an API aggregation platform which allows for the reduction in screen hopping and unnecessary application stacking.

ENGAGE: Internal and External Collaboration and Information sharing

21% higher profits when employees are highly engaged

Drive high performing individual efficiencies and outputs: Nimbulis establishes ongoing, multi connections between departments, partners and customers. Transform internal and external communications to keep people informed and on schedule.

EMPOWER: Focus on what matters to most anywhere with all off the applications you need

2x emails and attachments shared by financially successful companies

Creating simplicity by bringing together all the Line of Business applications you know and love into one interface, you can reduce context switching and create conversations around content.
