

With ten years of experience in aviation, we have developed several digital solutions designed to meet the needs of the aviation industry.

## MICROSOFT AZURE SOLUTION BUILDER PROFILE: WISELEAP, AN EMYODE COMPANY

Wiseleap's softwares helps ground handlers, airlines and airports improve operational efficiency using our ground handling products. Our aviation products leverage the latest web technologies combined with our years of experience and intimate knowledge of the commercial aviation industry. We customize each of these products to the unique needs of your operation.

### WHAT WE OFFER

Deicing Holdover is a winter operations productivity application designed with airline pilots' needs in mind. It can calculate a de/anti-icing holdover time based on user-generated inputs. It includes features such as de/anti-icing HOT calculator, digital HOT guidelines and expiration alerts. It is available on iOS and Android.

Deicing Manager is a one-stop-shop for inventory and ordering management, fluid usage tracking, and more; data input interfaces feed into real-time alerts and reports, providing snapshots of deicing operations as they occur. The platform offers a comprehensive solution for all parties involved in airline deicing operations.

Ground Handling Manager centralizes all information relevant to airline and airport operations management to offer a single, streamlined dashboard for improved operational and financial oversight. This web platform includes dashboard & reports and allows integration with any of your systems to capture relevant data.

Training Manager is a cloud-based training management tool specialized in tracking and managing your employee's trainings. It includes configurable training matrices to keep track of employee's training, live alerts when trainings are expiring or expired, configurable dashboards & reports and many other feature.

### MORE THAN A PROVIDER, A BUSINESS PARTNER

We guide our customers into their digital transition with a dedicated team customizing their solutions. We support you in your day-to-day, providing 24/7 support around the world.

# Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

## KEY USE CASES

### WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

### MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

### MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

### FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

### ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

### DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

### GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
