**Clinic to
Cloud**
Smarter Healthcare

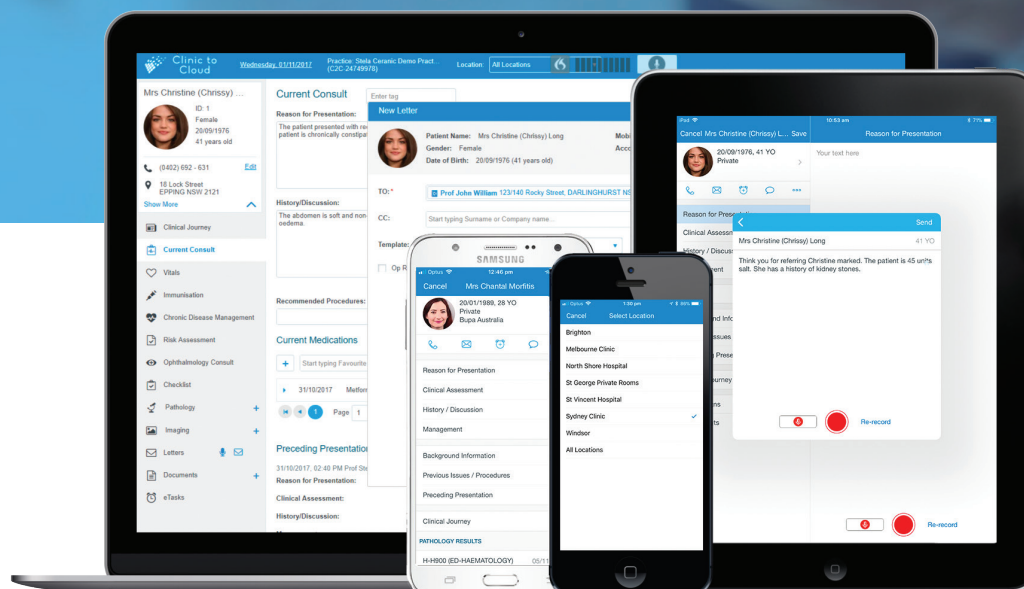

An example of our game-changing features

Letter management with voice-to-text speech recognition - Operation reports
Ordering investigations - Mobile - Billing & claiming (Medicare, Eclipse)
Xero integration - Patient portal - Etasks - Comprehensive reporting - Device agnostic

'As a busy ENT Head and Neck surgeon I wanted a system that gave me a modern interface, versatility and ease of access to patient records and results, especially when out of the office on operating days and away at conferences.

As one of the early adopters of the technology, I found the team responsive and attentive to initial hurdles in the onboarding process. I now enjoy some great functionality in my practice on Clinic To Cloud and especially more from my iPhone.'

Dr Niranjan Sritharan MBBS
Ear, Nose & Throat, Head & Neck Surgeon

There are many more features to show you.
