Integration Efficiency

Internal and external integration with client systems and data extraction

Technology Excellence

KOMPASS

Composable Architecture (KOMPASS) :

A unique solution architecture offered by Kanerika which delivers SAT to clients. **KOMPASS** has a multi layered and composable architecture which enables instant plug and play with any technology stack.

Open Framework :

It uses standard and prebuilt configurators along with connectors which ensure seamless data flow across complex proprietary and off the shelf solutions. It uses AI and NLP based technologies to analyze the data, create meaningful relationships, built dynamic patterns and automate redundant as well as mundane processes. It also analyzes processes dynamically, preempts blockages, and re-routes them to ensure greater productivity outcomes. Along with a set of prebuilt and preconfigured BOTS for mundane processes using the best-in-class technology, **KOMPASS** ensures ease of use, faster implementation and deployment, reduction in process time and improvement in accuracy of reporting.

A multi-carrier, multi-channel shipping solution designed to expedite the shipping process for online retailers

Features:

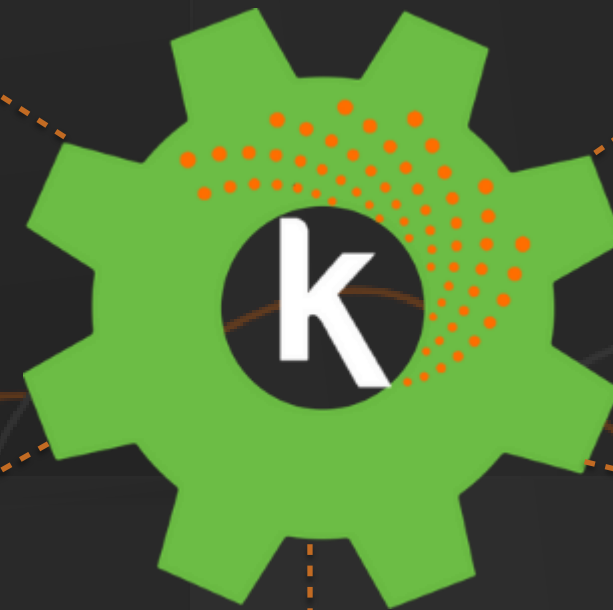

- Batch Shipping
- Discounted Shipping Rates
- Inventory
- Customer Management
- Custom Branding to streamline Order Fulfillment

Kanerika – ShipStation Offering

Business Intelligence solution can be deployed on the cloud and can be a real value add to the organization have visibility order, shipments, marketplace, and carrier data.

Our prebuild connector, DataWarehouse and Power BI Solution helps to integrate fast and go-live in a quick span of time.

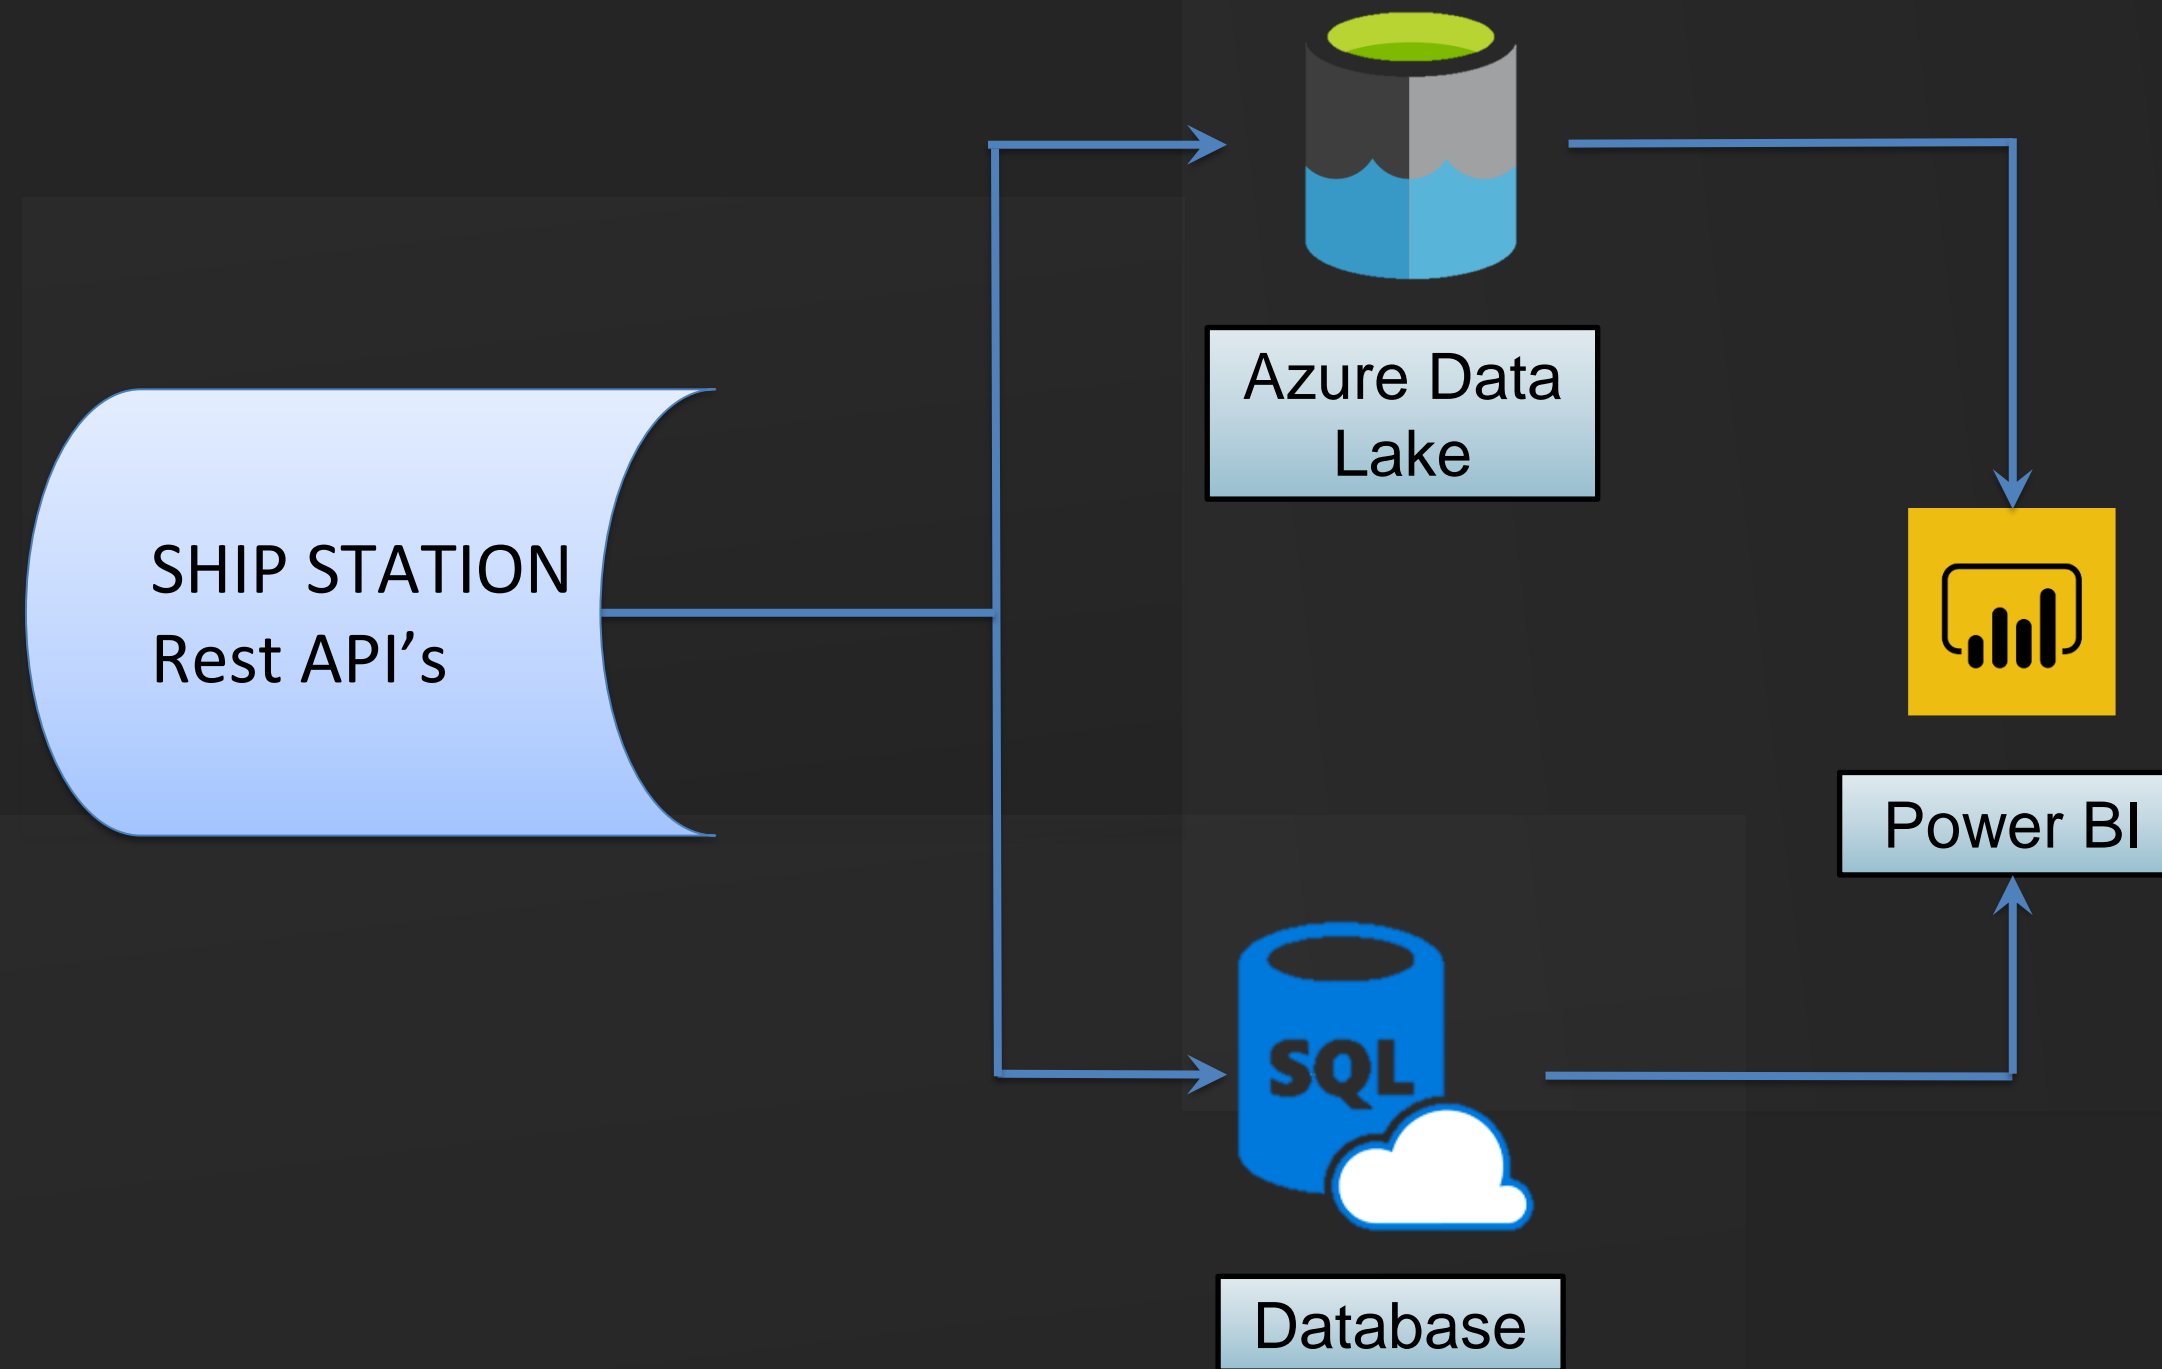

Provides the users the ability to analyze the data in a better manner.

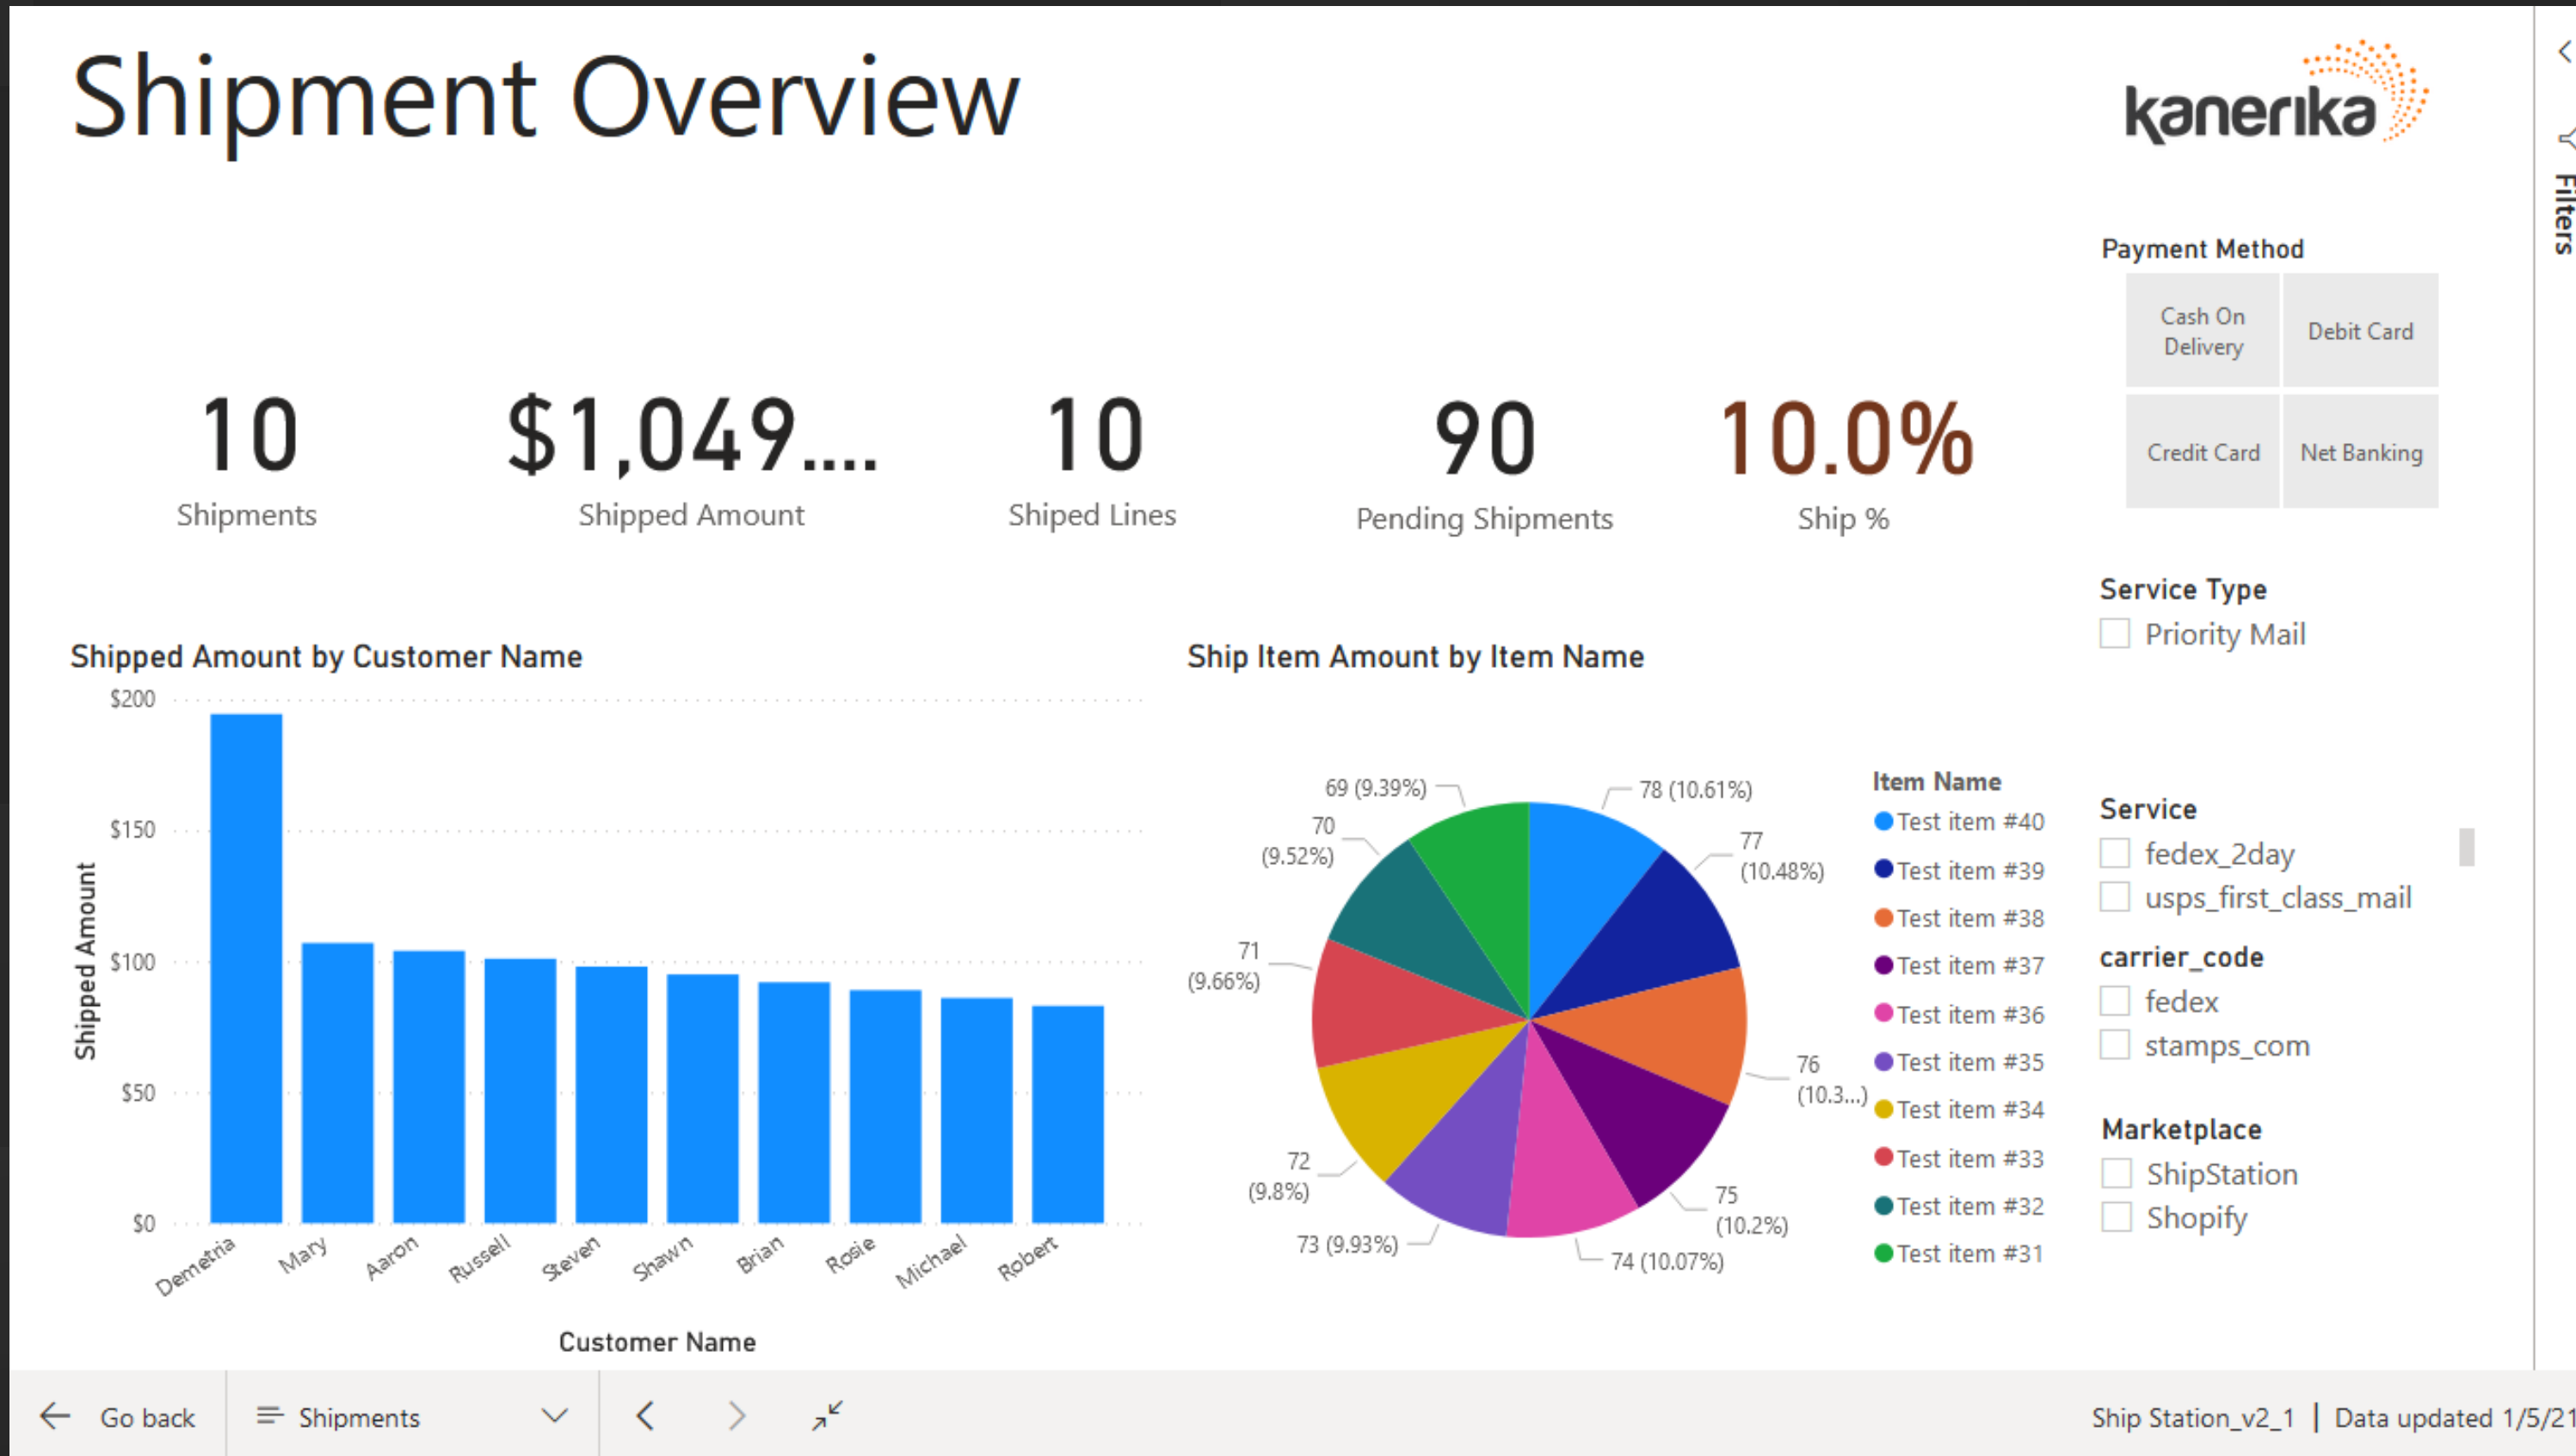

All Data from Shipstation can be visualized in seeded dashboard. Customers are provided with rich metadata so they can extend and customize the solution as per need.

Out of the box solution on Power BI using Azure Infrastructure.
