kubeark

The All-in-One Software Operations Management Platform

In today's booming tech market, your potential is limitless.

But the complexity of your software operations holds you back.

Managing software operations across multiple clouds and infrastructures is overwhelming and leads to errors, inefficiencies, and frustrations.

You face constant pressure to **optimize resources, minimize costs, and maximize performance**, ensuring high returns on tech investments.

The lack of visibility into software performance, resource utilization, and cloud costs inhibits decision-making, especially in multicloud environments with **data silos and fragmented information**.

kubeark

More than 85% of businesses are predicted to transition to multi-cloud environments by 2025

Gartner®

"

Things are changing at such a breakneck pace in our field, that I live in constant dread of being left behind

CTO, Software delivery business

kubeark

Kubeark enables you to manage your software operations at scale, on any infrastructure

Seamlessly manage software lifecycles while continuously enhancing performance, cost & resource efficiency, and technology ROI.

Elevate software scalability, performance, and governance

Drive business growth and operational efficiency

Simplify complex operations across clouds and infrastructures

Boost ROI with accelerated time-to-market and new cloud revenue streams

kubeark

"To simplify multicloud management, enterprises are turning to **metacloud:** a layer of abstraction and automation that cuts through the complexity of multicloud environments.

This family of tools and techniques can offer a single pane of control for organizations feeling overwhelmed." - *Deloitte Tech Trends Report 2023*

Deloitte.
Insights

Now you can scale beyond what you thought was possible in your environment.

- ✓ Private clouds
- ✓ Public clouds
- ✓ Hybrid clouds
- ✓ On-premises
- ✓ Open systems
- ✓ Closed systems

Partnering with leading tech providers

Microsoft   Ui|Path™   aws PARTNER   Google Partner   ORACLE PARTNER

Built for Your Scalability

Day 2 Operations

Strategic

Connect your business rules to your tech stack and immediately start managing your resources

Autopilot Operations

Instant

Seamless experience through unification of business logic and infrastructure operations

App Environment Management

Flexible

Fully automated real-time environment management

Sustainable investments

Elastic

Eliminate unneeded computing power

Journey simplification

Abstraction

Remove the difficult coordination of your process and drastically reduce learning curve

Machine infrastructure

Multi-prem

Agnostic cloud and on-prem deployment and resource management

Maximizing Software Potential

kubeark

Enabling Growth Across Your Organization

FinOps & RevOps

Optimize resource and cost management

Improve forecasting and monitoring

Streamline billing and revenue recognition

DevOps & Infrastructure

Efficiently manage large-scale, distributed applications

Improve application scalability, performance and availability

Automate infrastructure tasks to reduce manual intervention

Product Management

Accelerate time-to-market

Enhance product lifecycle management

Drive continuous improvement and data-driven decision making

Sales & Business Development

Expand revenue streams and sales opportunities

Tap into pre-committed cloud budgets and avoid vendor onboarding

Shorten sales cycles and closing times

Executive Leadership

Future-proof your organization with greater innovation

Improve your bottom line with higher returns on your tech investments

Accelerate strategic decision-making with real-time insights

Zetta Cloud: ML Model-as-a-Service Transformation

Problem

Zetta Cloud sought to expand its client base but needed an efficient way to scale and distribute their ML models. They needed a platform to transition their solutions to a SaaS model, ensuring high performance, security, and ease of use.
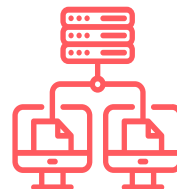

George **Bara**

Co-founder and
Head of Business Development

"Kubeark took our product, which previously was installed manually by the client in their own infrastructure, and made it into a solution available instantly, on any infrastructure. In this version, the clients have easy access to everything they want."

27%
of annual turnover in cost savings

Key Outcomes

- ✓ Successful SaaS transformation
- ✓ 27% annual cost savings
- ✓ Faster, open deployments
- ✓ Minimized infrastructure costs
- ✓ Increased product accessibility
- ✓ Multi-cloud support

CRM Connect: Valued Customer

Problem

Deploying a major infrastructure that can support 6,000+ customers is a challenge to anyone.

Solution

Using Kubeark, CRM Connect was able to SaaSify its platform, deploy instances in near real-time for each new client, keep resources to a minimum, use its hybrid-environment for each client type and have a coherent upgrade procedure.

Bogdan **Minoiu**

Founder & CEO

"Kubeark has saved us months of development time and has created a robust infrastructure that not only saves cuts back on costs, but also increases our client retention with its elasticity. Our DevOps team has been thrilled to find out that they no longer need to maintain scripts and code to keep the platform up and running. Kubeark's technology has been a virtual plug-and-play into our hybrid environment."
