aisoncore

Traceability
of your components
in repair

Aisoncore is a digital platform that enhances communication and gives visibility to the process between a mining company and repair and maintenance service providers, allowing to manage requests, work orders, as well as to know the location and progress status of mining assets under repair in real time.
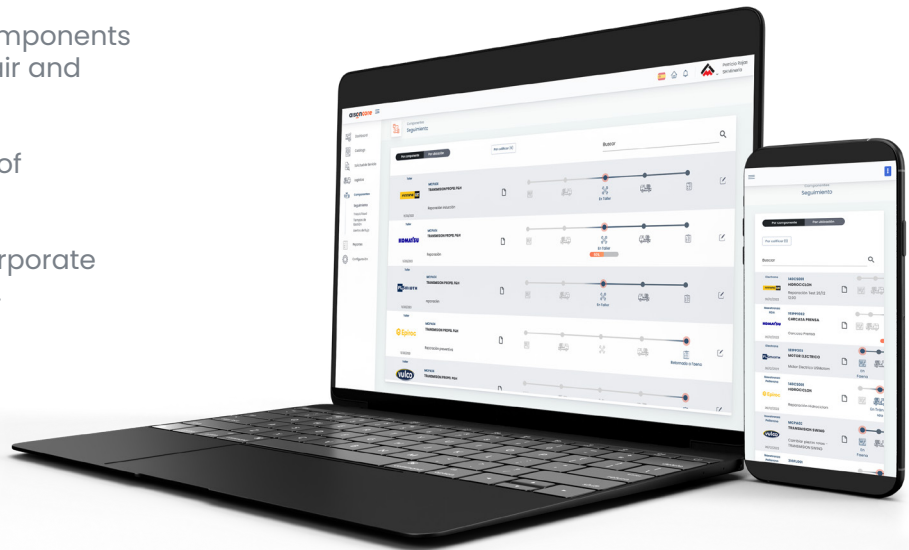

More visibility,
less losses

> Aisoncore is a multi-platform cloud SaaS solution that connects mining companies and their repair and maintenance service providers. It can be used from any device such as work station, laptop, tablet and/or mobile.

> Provides real-time traceability of components repair, managing the complete repair and maintenance lifecycle.

> Offers visibility of repair status, time of intermediate and completion tasks.

> Provides integration services to incorporate tools such as CMMS, ERP, and others.
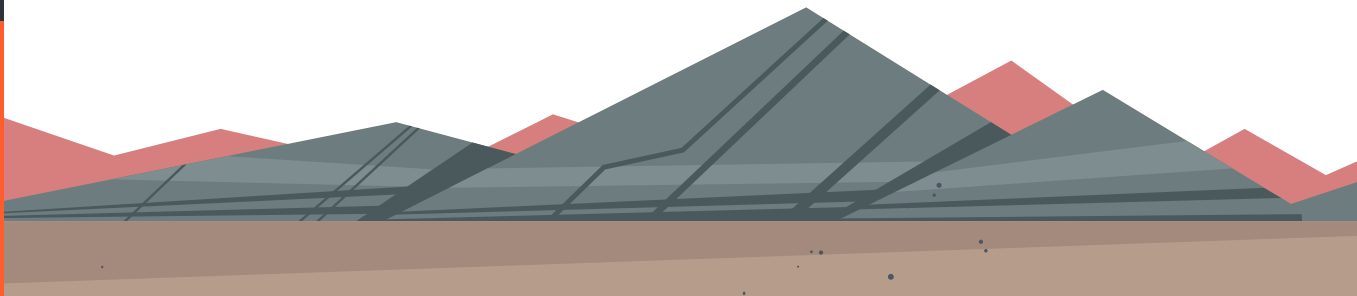

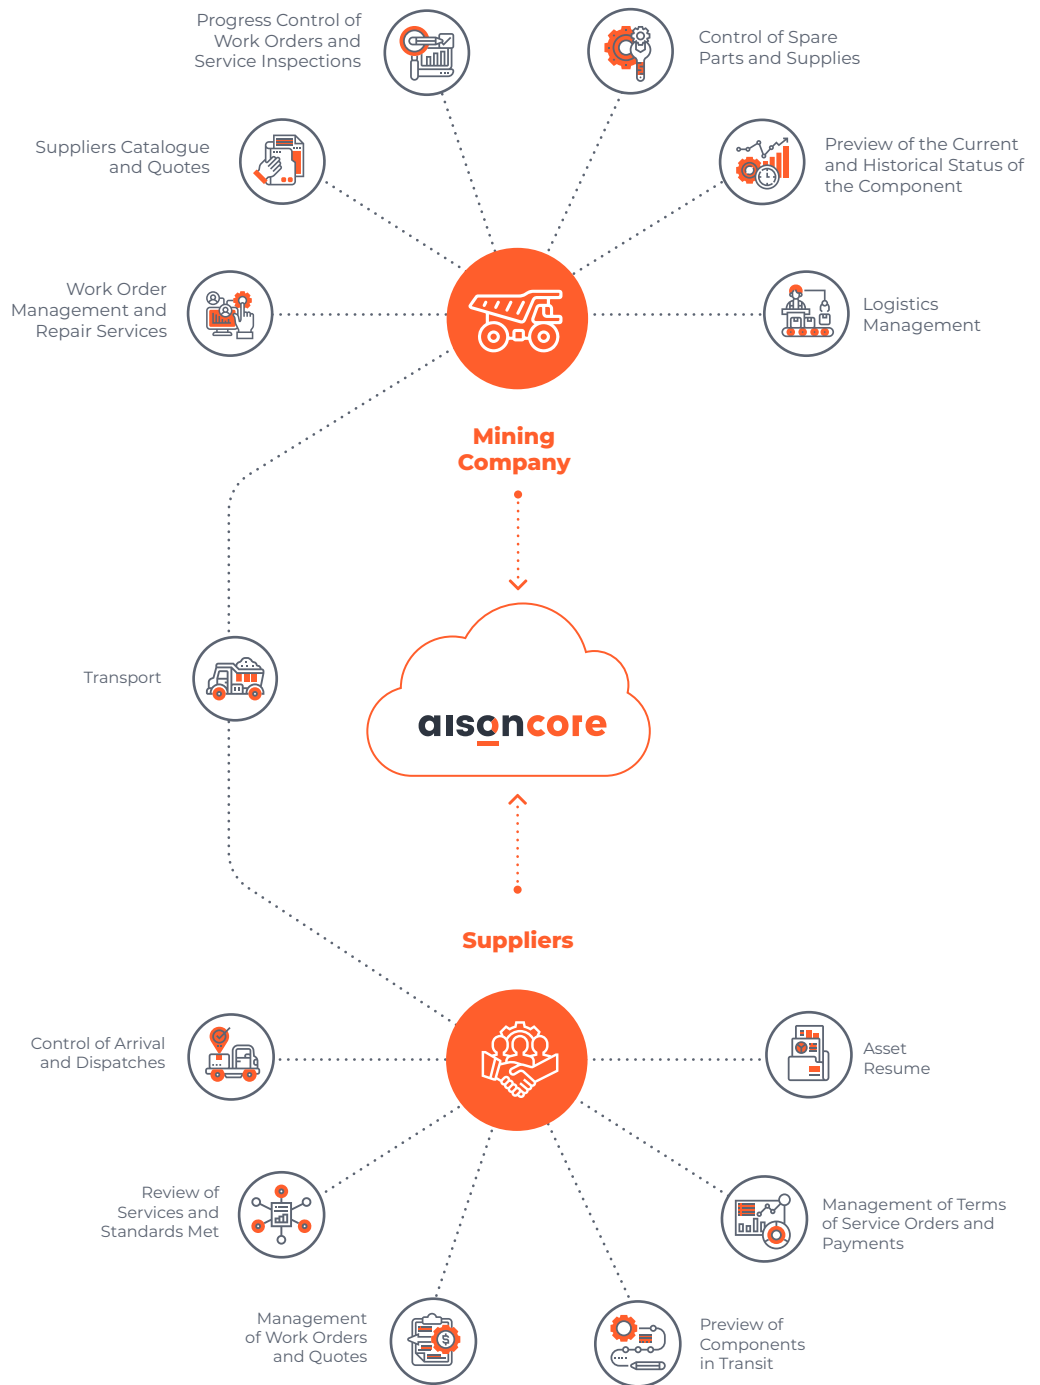

See your components' resumes.

Monitor W/O progress and location in real time.

Evaluate and communicate with your repair providers.

And much **more**
