#1 in the PL AppStore, Shopping

SEE CASE STUDY >

Evidate for Tauron

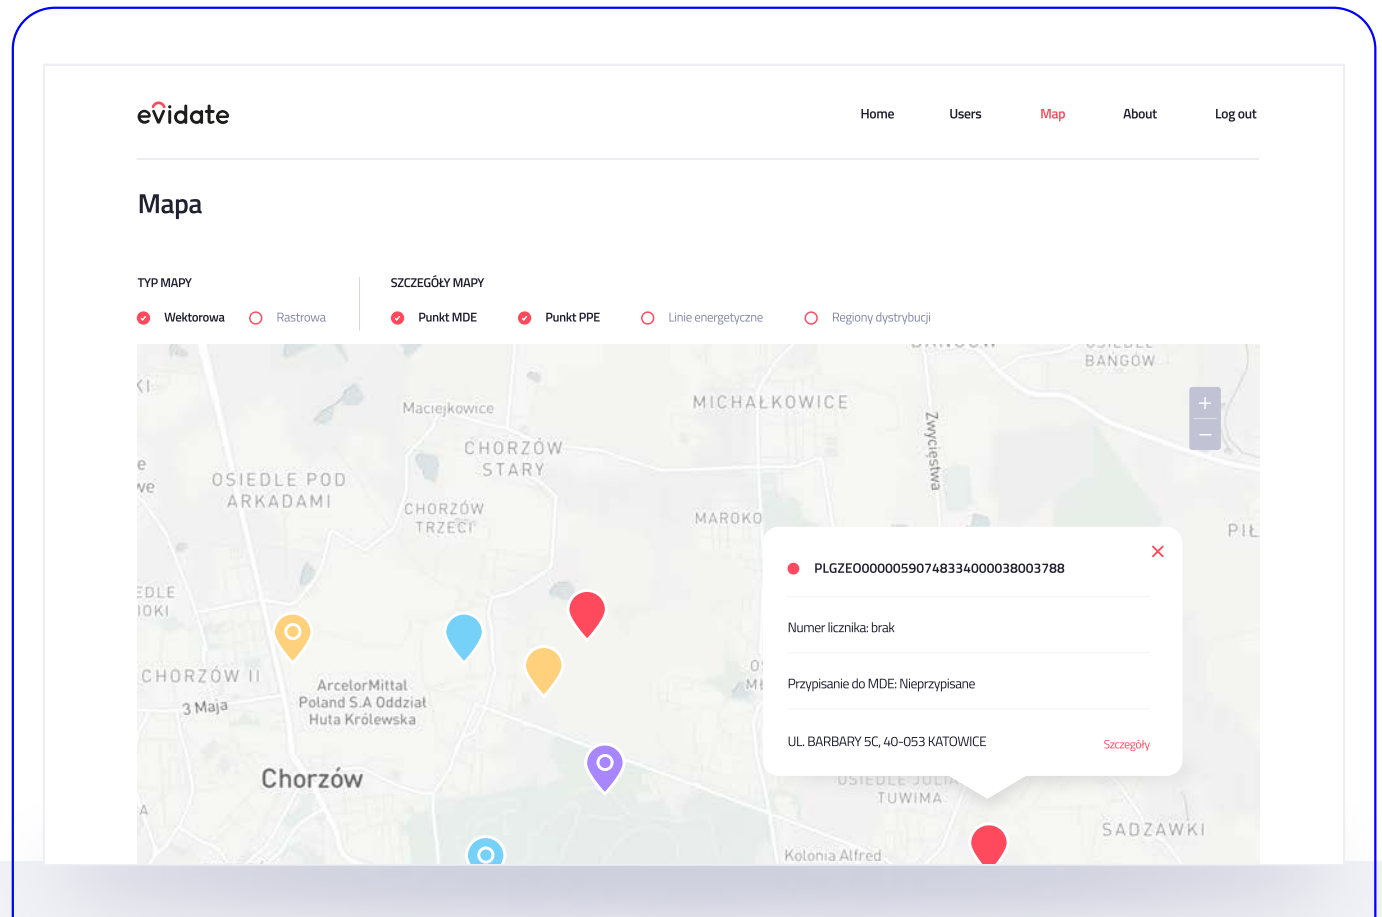

Take inventory and passport technical networks onsite.

 UTILITY

 POLAND

Dual sided tool intended for both administrators and field employees alike. Geolocation inside the mobile app helps track and record important data, e.g. electricity consumption. Administration panel allows managing user accounts and generating reports. The system automatically synchronizes so all the data is always up-to-date.

Scope: Consulting, UI/UX design, mobile, frontend, backend, QA, hardware & accessories.

Deloitte

Tax application used by major financial institutions in Europe.

A complex solution for full tax processes automation and control. It significantly reduces the risk of wrong data insertion or errors and allows sending tax declarations easily with only a few clicks. The technology can be adjusted to a particular company's needs and implemented safely into its processes. It links data from varied accounting systems and stores archived declarations.

Scope: Product workshops, backend development, admin panel.

 FINANCE

 EU

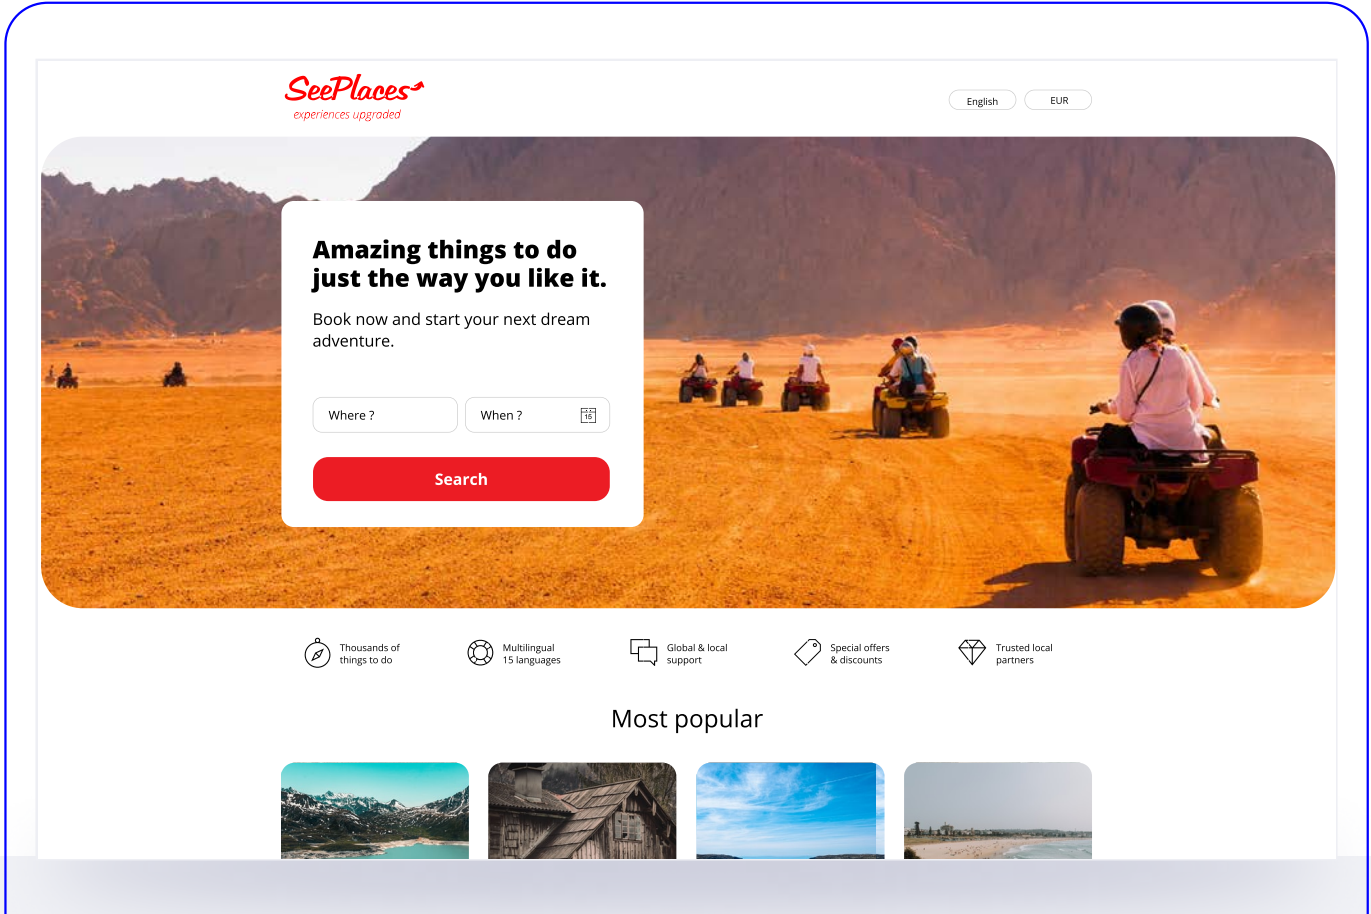

Itaka

Browse through all the dreamy destinations and choose the best match.

It's a multilingual call center with 24/7 service and multi currency payments - a true game changer in the travel industry. It offers 1200 excursions in 45 countries worldwide and cooperates with over 70 local travel agencies in 7 different languages. Elastic search allows to browse for exciting facultative trips during holidays.

Scope: UI design, technical stack assessment, frontend, backend, cloud technologies, multiple integrations, QA.
