# dimeo

by *innoteo*

The **solution** for training and maintenance in **Mixed Reality**
What is **dimeo** ?

« Train any operator on any process in a few minutes, thanks to holograms guidance »

Intelligent training
Learning by Doing

Made with industrials
To meet business requirements

Intuitive conception
Visual and no-code interface

Easy to use & deploy
Adapted to each profile

Digitalize your know-how
To make it more accessible

Available Worldwide
Support several languages

innoteo
Digital energy for business

How to use it ?

Editor

Player

Player

1. Create your scenario

Create your steps with instructions to indicate the manipulations to perform step-by-step

2. Place your holograms

Superpose holograms to real objects to guide precisely the operators in their manipulation

3. Provide to operators

Operators will just have to follow the pedagogic course prepared to perform their tasks autonomously

innoteo

1. dimeo Editor
# An intuitive conception

Create your scenario step-by-step

Add contents* to your steps

Assign your module to specific users

Transfer your module to your HoloLens

Multiple content : Text, Questions, 3D Objects, Images, Videos, PDF, PPE

2. dimeo Player
For holograms placement

Browse your module step by step

Superpose 3D objects* to real objects

Place a target to lead your operator

Add photos & videos with the HoloLens

*It can be your own objects, or those included in dimeo.
Compatible formats : OBJ, FBX, GLTF, GLB, 3MF, STL, ZIP, PLY

3. dimeo Player
# An interactive course

Choose your profile and module

Browse the steps with hands, eyes or voice

Consult instructions and medias given

Perform the manipulations* guided by holograms

*dimeo saves all actions performed by operators via statistics.
The administrator is then able to control and validate training / maintenances

For industrials, and WITH industrials

Offline mode
Adapted to industrial environments

Step validation
Control and validate each action

Multiple choices
Adapt the scenario to the answer given

PPE Integration
Display the safety equipment to wear

Simulator on PC
HoloLens render preview before transferring

Information feedback
Report rapidly a problem or breakdown

innoteo
Digital energy for business

Integrated Azure Services

Remote Assist
Call a remote expert

Remote Rendering
Cloud render for 3D obj.

Power Apps
Access to the apps

Power BI
Stats display

Cognitive Services
Artificial intelligence

Active Directory
To link dimeo & Microsoft account

Objects Anchor
Replace QR Codes by real objects
