Automate Emissions Calculations

- Integrate data sources across the organization (ERP, Oracle, APIs)
- Quantify Scope 1, Scope 2 and Scope 3 emissions across categories
- Receive analytics-based insights on current and future footprint
- Easy-to-use dashboard to understand the large contributors to the footprint
- Streamline final reporting to different frameworks
 - Reduce manual effort of data collection and analysis to multiple standards

*Illustrative

••			
Data	Scope 1	Scope 2	Scope 3
	Source	Source	Source
Calculations		Purchased cooling	1. Purchased goods and services
	Fugitive emissions	- archased cooling	2. Capital goods
	Industrial process	Purchased electricity	5. Waste generated in operations
Insights		Purchased heat Purchased steam	7. Employee commuting
	Mobile combustion		9. Downstream transportation and distribution
	Stationary combustion		12. End-of-life treatment of sold products
