

Safely deliver data from the edge

Cisco Edge Intelligence simplifies visibility and edge-to-cloud data flow with a single pane of glass for management and unlocking business intelligence. Integrating with Cisco's industrial networking, it delivers needed flexibility and scalability to securely extract, transform, and deliver data from the edge to the cloud and local apps.

Cisco Edge Intelligence

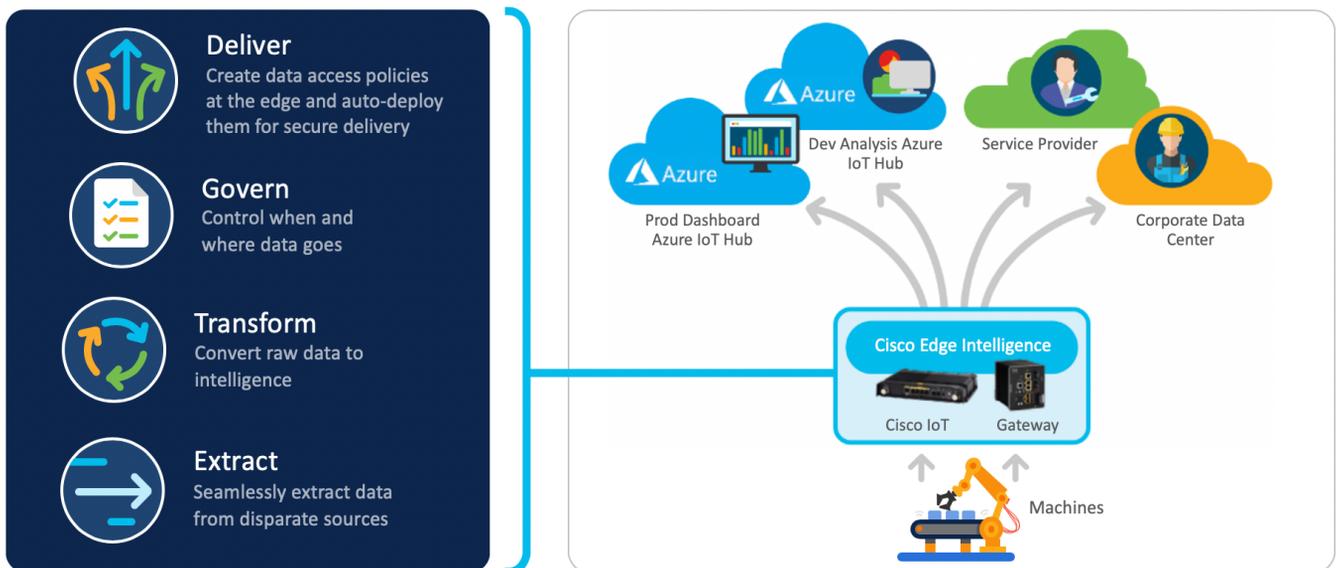

A secure, out-of-the-box solution that reduces the number of vendors needed to create an IoT solution

Fully integrated with Microsoft Visual Studio to help developers create, test, and deploy code and push apps out

Architected to pass data seamlessly to Microsoft Azure

Take advantage of the latest in edge-cloud technology
