

amaze® for Apps  
On  Cloud

# Amaze® Powers Our Ability to Drive Large Scale Transformation at Pace

**amaze®**  
for Infrastructure

**Secure Migration to Cloud**

- Quick non-intrusive lift tweak & shift migration of infrastructure
- Assisted self service for simple workloads

Benefits Derived Due to Automation

- Enhanced server hardening & security
- License optimization & right sizing

**amaze®**  
for Applications

**Modernizing Applications on Cloud**

- Automated modernization of **core mission critical applications**
- Support transformation to **containers and PaaS capabilities**
- Fix issues and reduce technical debt

Benefits Derived Due to Automation

- Automated architecture review
- Automated conversion of monolith to modular services
- Automated Replatforming from legacy to modern PaaS services

**amaze®**  
for Data & AI

**Datawarehouse Ecosystem Migration**

- Complete Data warehouse ecosystem migration including **Data Store, Pipelines & Visualizations**
- Supports multiple on-prem systems to **Azure Cloud**

Benefits Derived Due to Automation

- Automated discovery and assessment
- Automated transformation of ingestion, data store and visualization
- License optimization

**amaze®**  
for ERP

**ERP Migration**

- Complete ERP migration including **Customizations**.
- Supports **SAP, Oracle ERP from On Premise to Azure Migration**

Benefits Derived Due to Automation

- License optimization & right sizing
- Version Upgrade
- SaaS enablement
- Database Migration

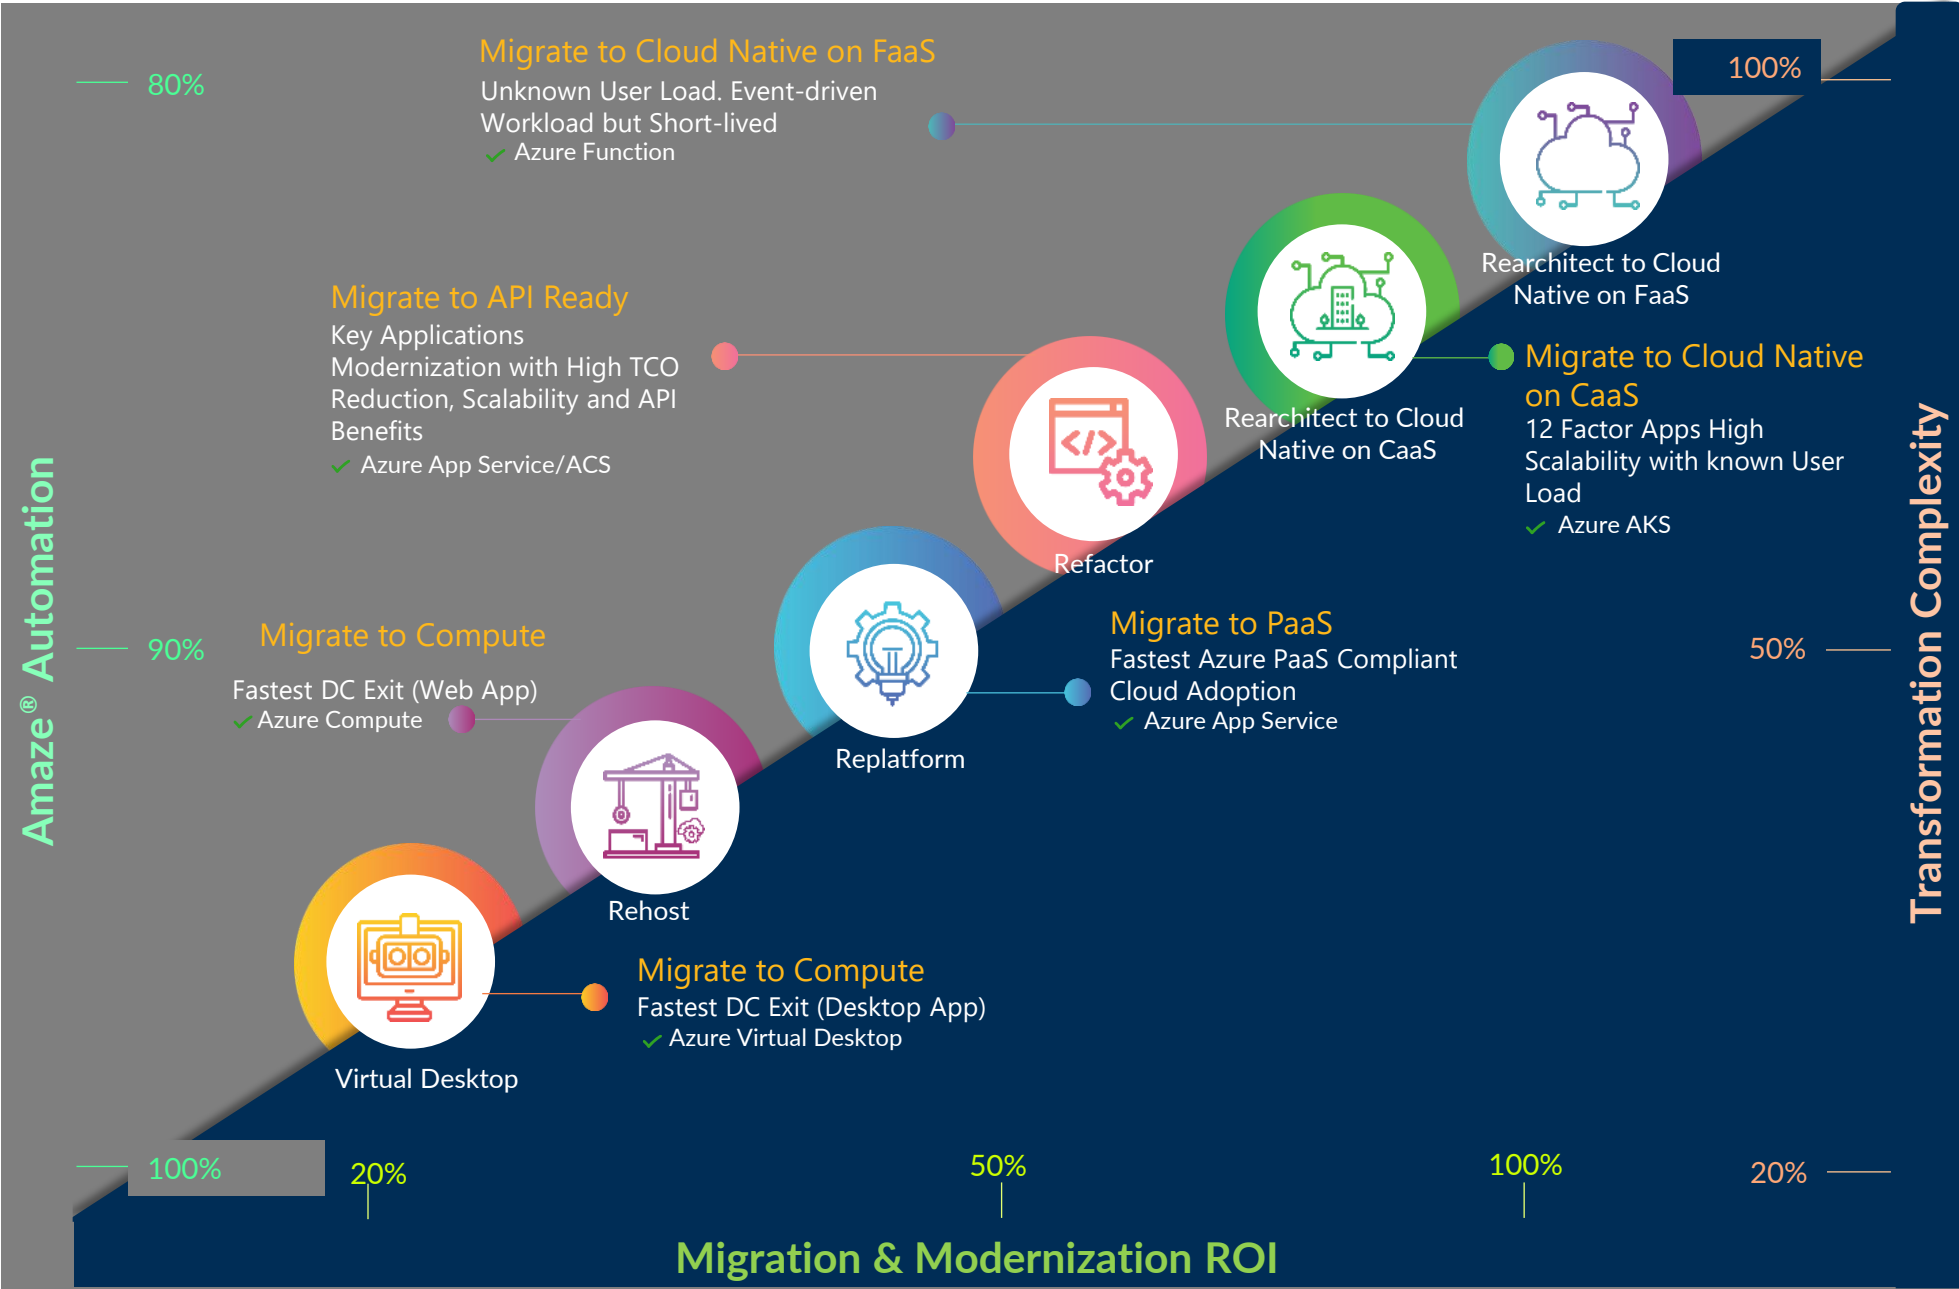

**amaze®**  
for Assurance

**Cloud Testing & Validation**

- Platform for end-to-end assurance of **migration programs**
- Process validation** to optimize resource cost & security

Benefits Derived Due to Automation

- Coverage through strategy, planning, execution and reporting
- Configurable rules for compliance and security
- Single Test and validate all cloud journeys from rehost to cloud native

### Art of Possible

**No Source Code Available (COTS)**

- ✓ Migrate to Compute (Desktop App or Web App) as Rehost
- ✓ Migrate to PaaS (Web App) As Replatform

**Source Code Available**

- ✓ Migrate to API (Refactor)
- ✓ Migrate to Cloud Native on CaaS (Rearchitect)
- ✓ Migrate to Cloud Native on FaaS (Rearchitect)

# Hexaware Amaze for Apps Benefits®

**50%**  
Cost Savings

**50%**  
TCO Savings

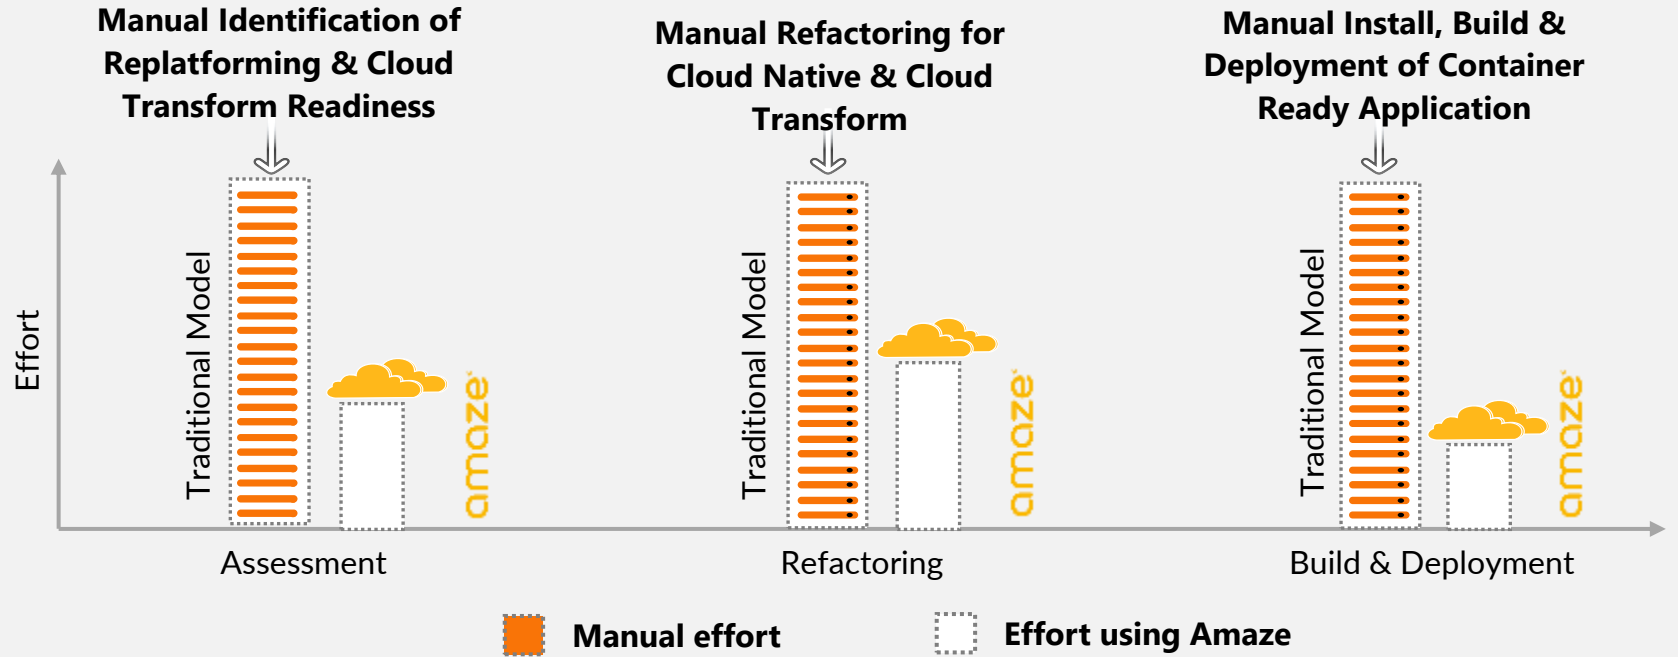

**50%**  
Faster Than Manual

Predictable Performance & Quality

High Security and Compliance

**amaze**  
for Applications

- Replatform Readiness Analyzer
- Refactoring Engine
- Application Builder

**50%** **to** **60%**  
TCO & Implementation Cost Savings

**40%** **to** **50%**  
Reduction in Cloud Migration Time

Enhanced Productivity & Higher Quality

# Hexaware Rated #1 in the HFS Market Analysis: Disruptive Hyperscale Cloud Service Providers Report

Hexaware was the only service provider to receive an “A” grade across all three categories in the HFS Report Market Analysis: *Disruptive Hyperscale Cloud Service Providers*.

Capability	Grade
Ability to Execute	A
Innovation	A
Voice of the Customer	A

Source: HFS *Market Analysis: Disruptive Hyperscale Cloud Service Providers* Report. Published: March 2021. Authors: Joel Martin, VP Cloud Strategy, and Martin Gabriel, Associate Director, Research.

“Hexaware is bringing a compelling mix of methodologies and solutions to accelerate cloud migration efforts...including working with the hyperscalers to develop its own intellectual property. The firm’s Amaze® portfolio offers clients access to a large toolbox of accelerators to support engagements.”

Joel Martin  
VP Cloud Strategy

# Amaze Catalog

---

# Amaze® Cloud Transformation Catalog

On-premises Technology	App Modernization/ Cloud Transformation to Cloud Native App with CI/CD on Private/Azure Cloud			
	VM/ Kubernetes/ PCF/ OpenShift	Azure App Service	Azure App Service /ACS	Azure AKS/Azure Function
 <p>ASP.NET, Razor, SPA, .NET Legacy, WCF Web Service, Messaging, Batch, ADO, Entity Framework, Telerik on IIS</p>	Decoupled AS-IS ASP.NET, Razor, SPA Front End Integrated with Macro Business Services with Rest/SOAP, Messaging, Batch Endpoint with ADO.NET, Entity Framework on .NET Core 3.15/5.0 with CI/CD on Kestral/IIS			
 <p>JSP, Servlets, JSF, Struts, SPA, EJB, Web Services, Messaging, ORM, Batch on WebLogic/WebSphere</p>	Decoupled AS-IS JSP, Servlets, JSF, Struts, SPA Front End Integrated with Macro Business Services with Rest/SOAP, Messaging, Batch Endpoint with ORM Framework Spring Boot on Tomcat/Spring Batch on Java 1.8+ with CI/CD			
	Macro Business Services with Rest/SOAP, Messaging, Batch End Point with ORM Framework Spring Boot Integration on Java 1.8+ with CI/CD			
	TIBCO MQ/ IBM MQ/ Sonic MQ/ Active MQ	Azure Web Pub/Sub	Azure Service Bus	Azure Service Bus
	Autosys/ Control-M/ Quartz	Azure Web Jobs	Azure Batch	Azure Batch
	Oracle/ DB2/ Sybase/ SQL Server/ Postgres	Azure Postgres	Azure Postgres	Azure Postgres

# Cloud Transform Assessment

---

# .NET Application Cloud Transformation

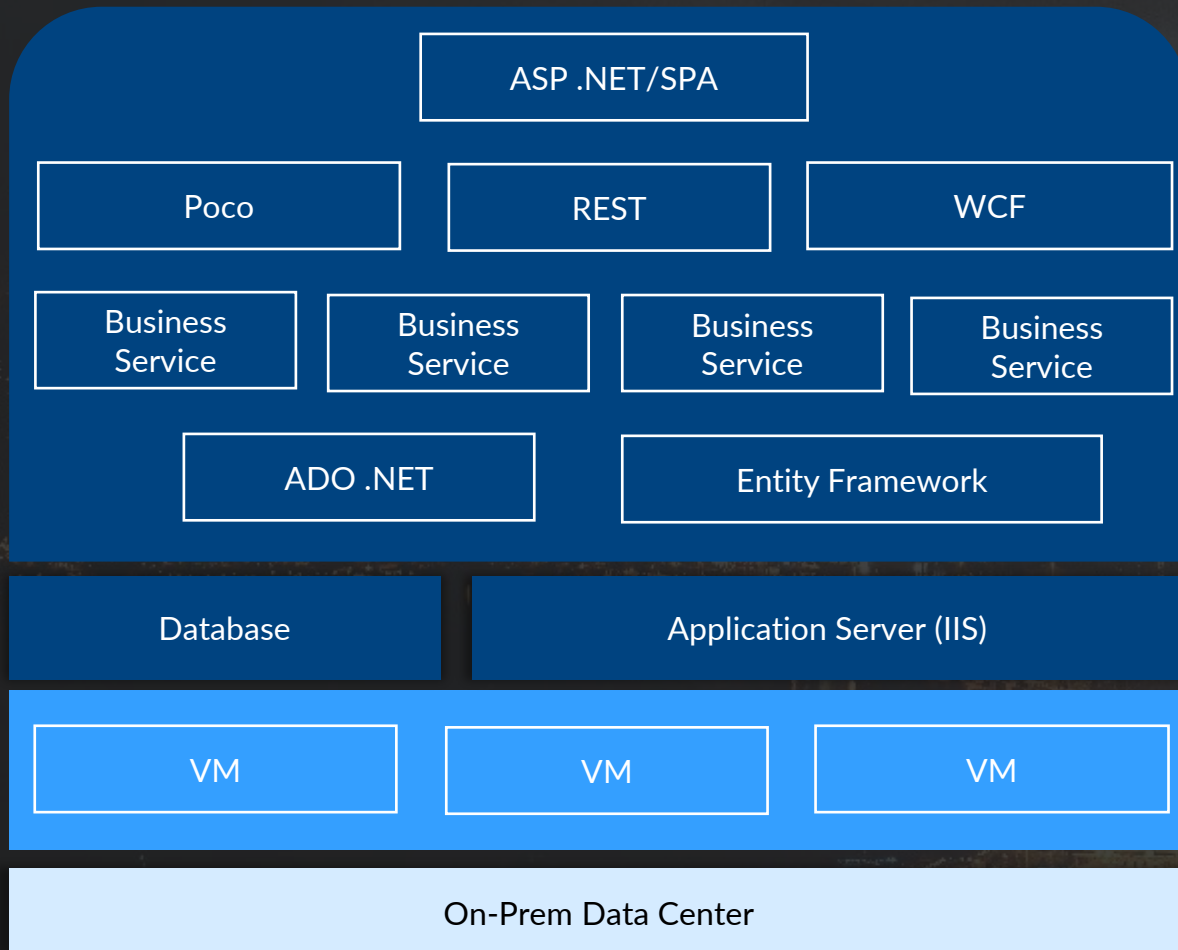

---

# .NET Cloud Replatform powered by Amaze®

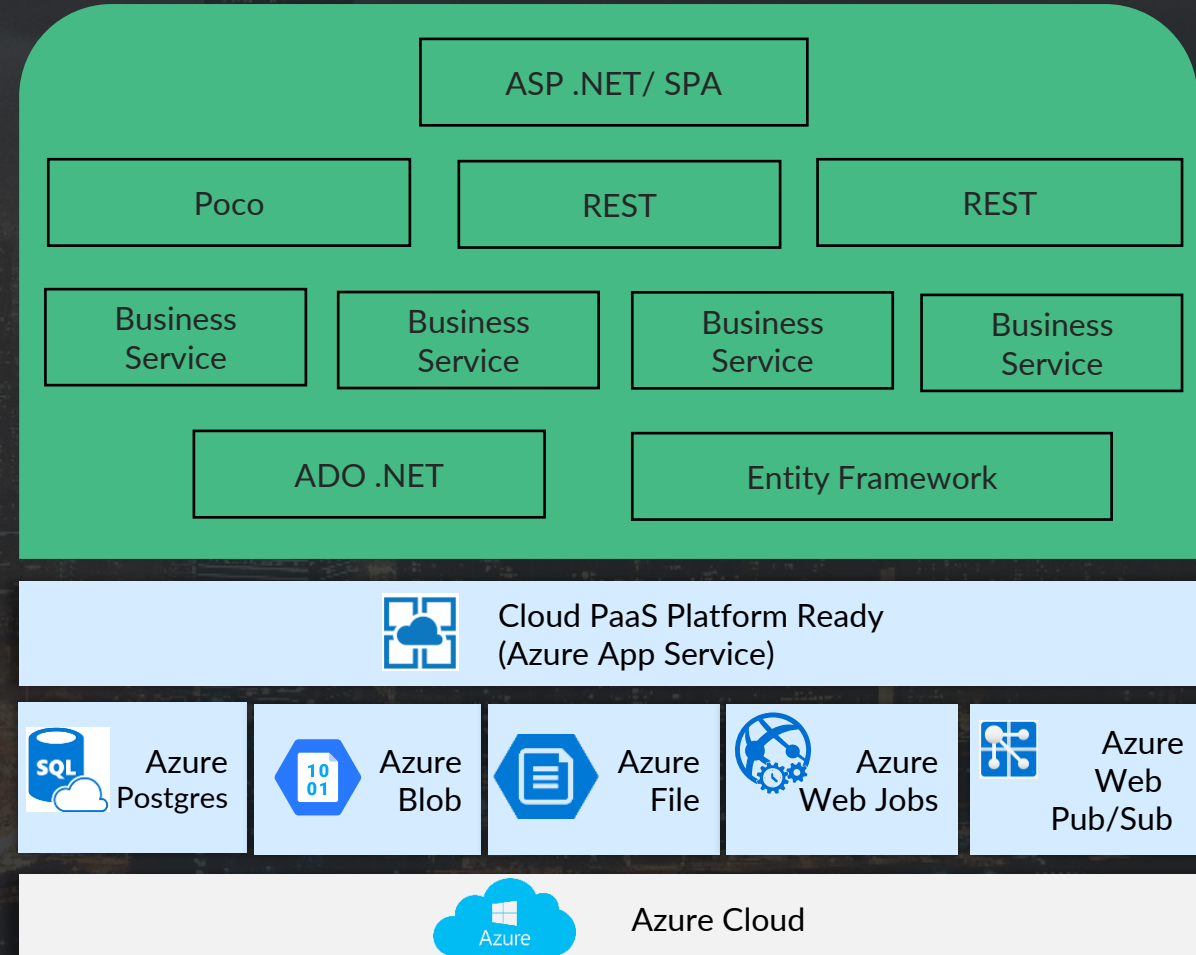

## On-Prem View

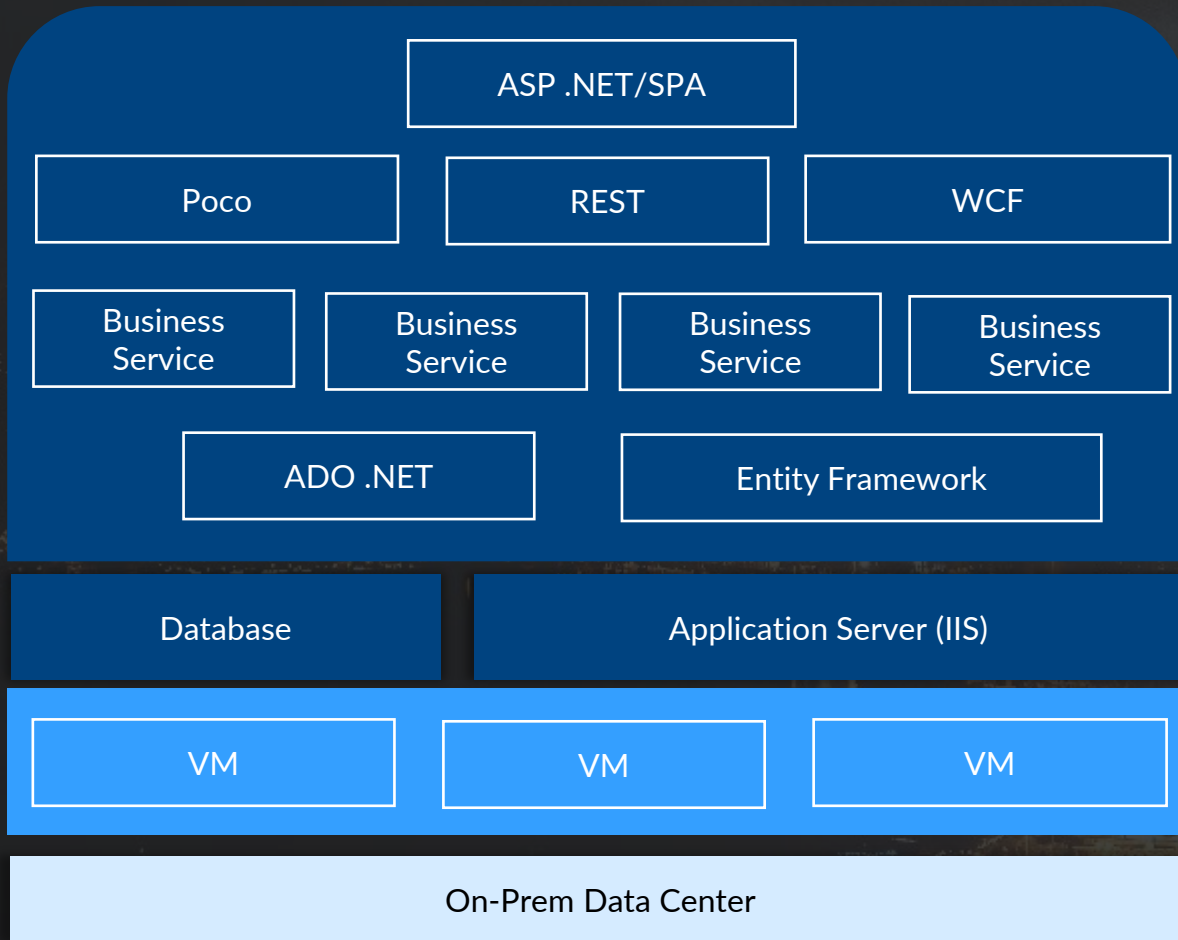

- Application availability dependent on hardware redundancy
- Application scalability limited to hardware horizontal/vertical scaling
- Monolithic Application

## Post Replatform View

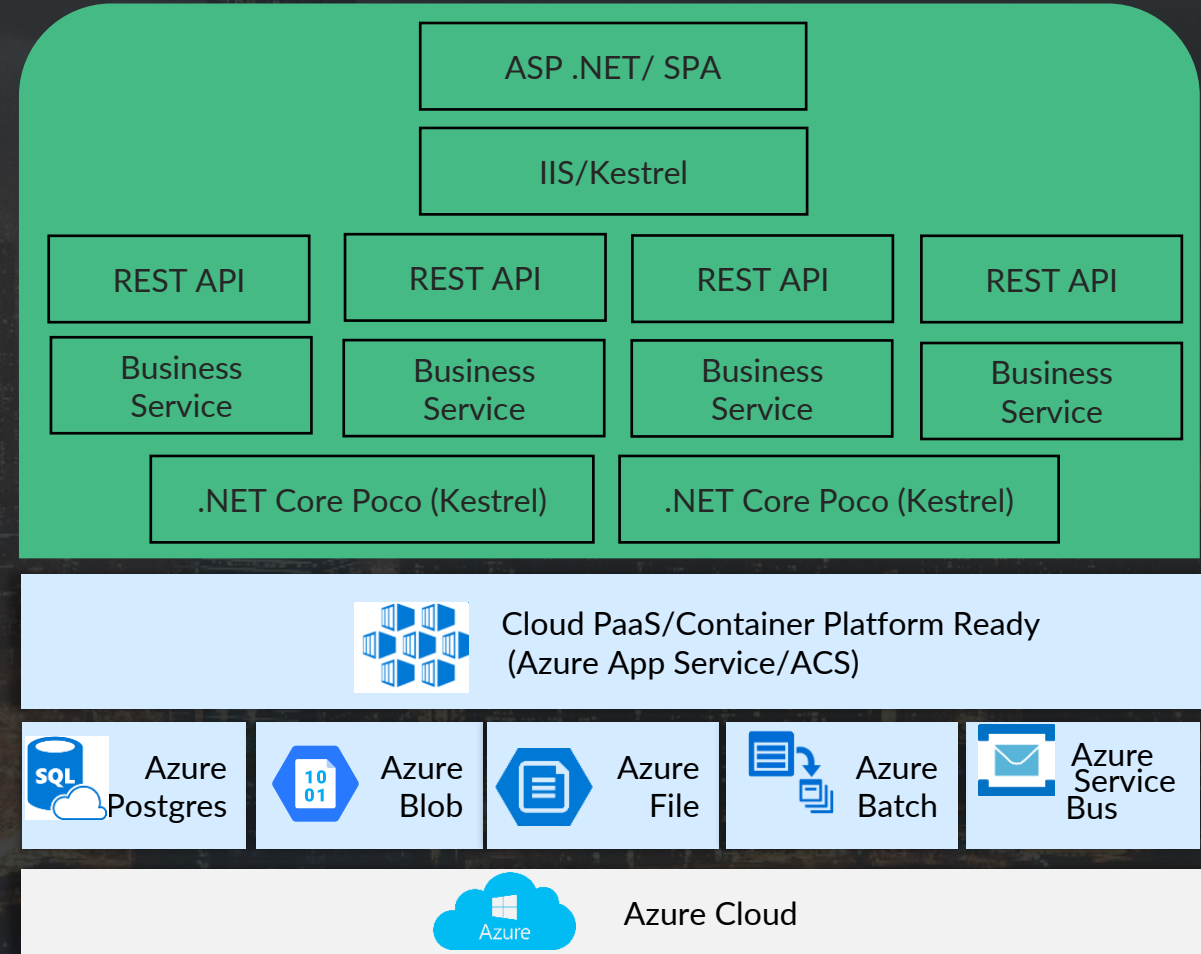

- Application Platform Maintenance on Cloud
- Application Scalability on Cloud Infra
- Monolithic Application

## On-Prem View

- Application availability dependent on hardware redundancy
- Application scalability limited to hardware horizontal/vertical scaling
- Monolithic Application

## Post Refactor View

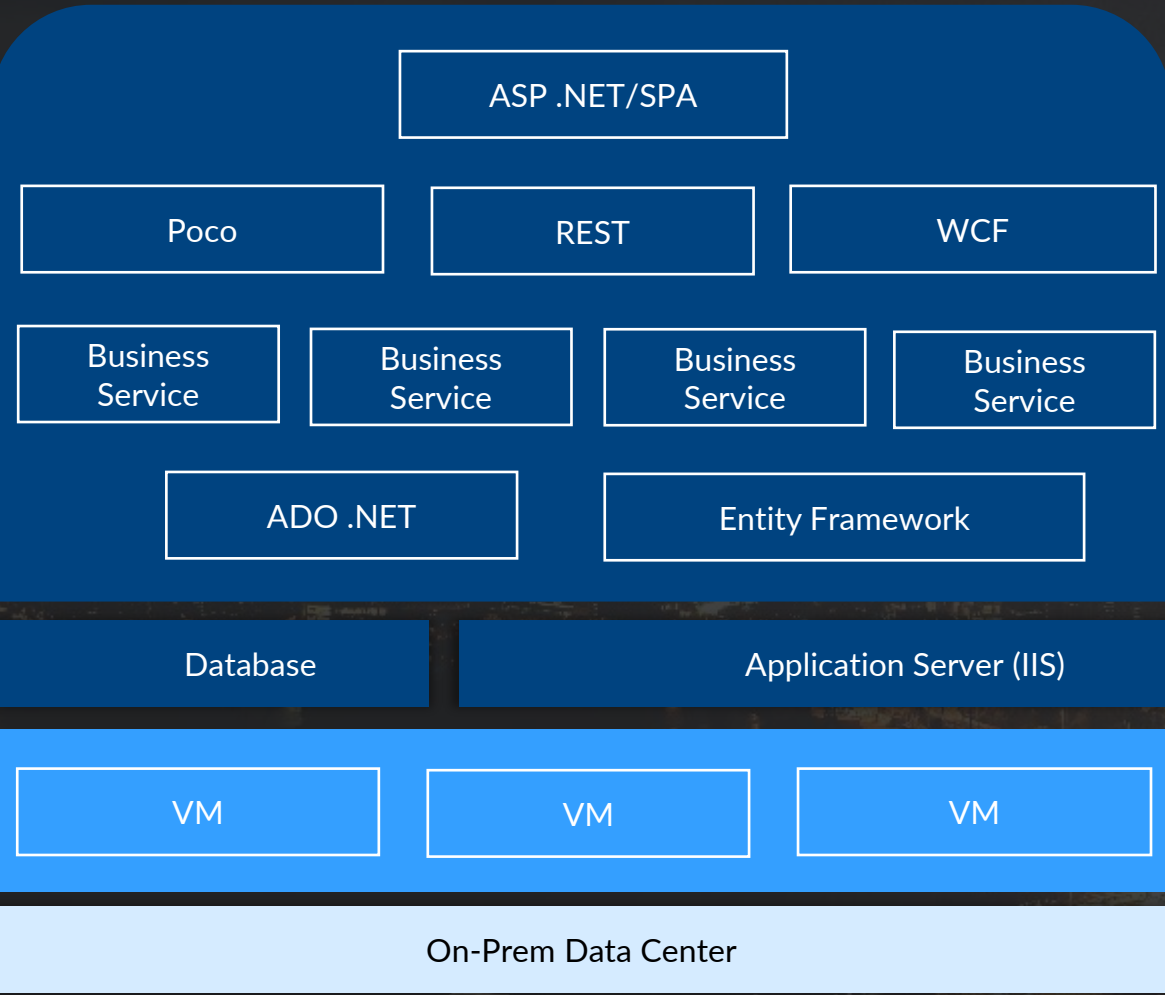

- Application availability dependent on Container platform
- Application scalability increasing by API instance
- Cloud Ready Architecture with Modularized API

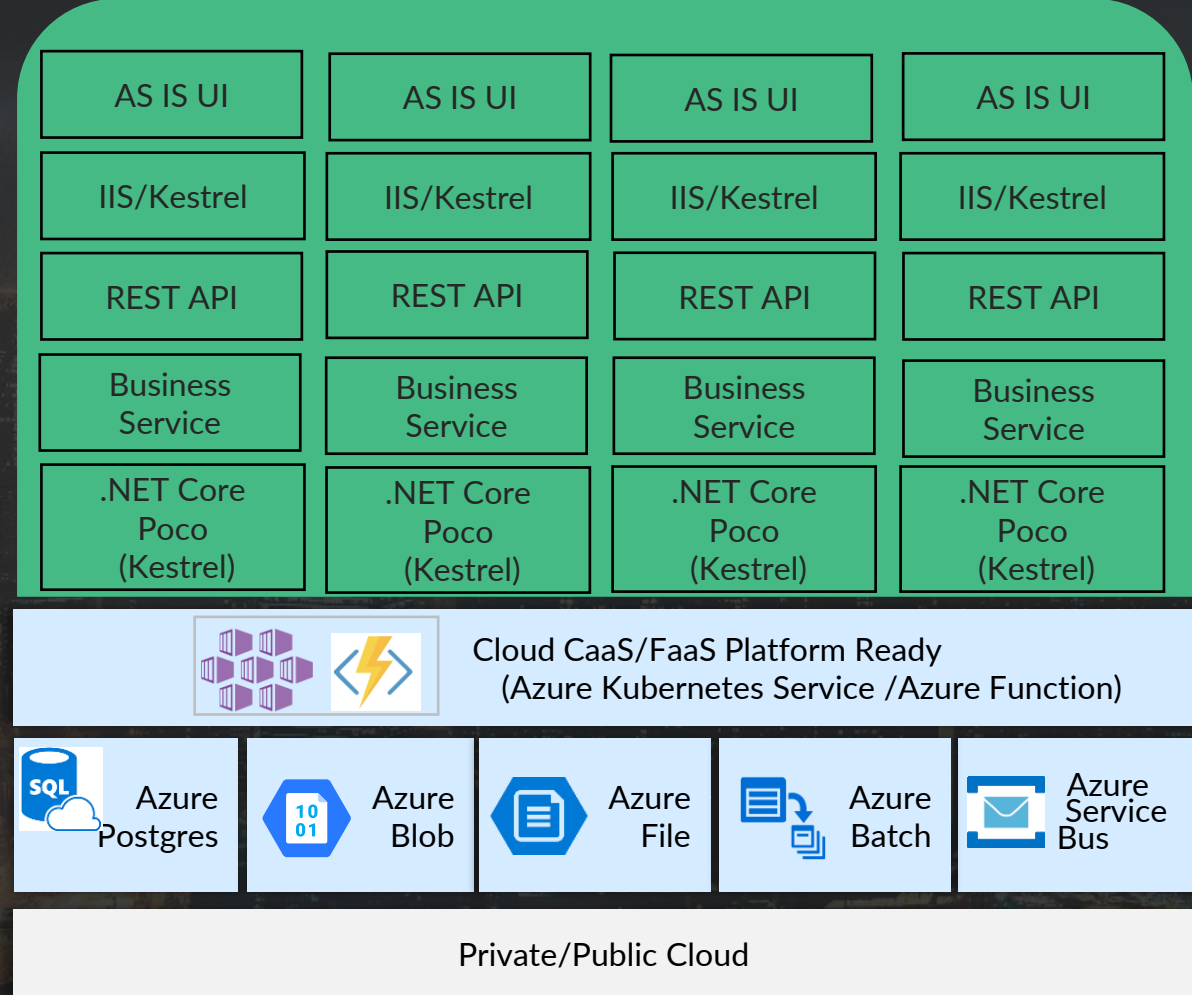

# .NET Cloud Rearchitect powered by Amaze®

## On-Prem View

## Post Rearchitect View

- Application availability dependent on hardware redundancy
- Application scalability limited to hardware horizontal/vertical scaling
- Monolithic Application

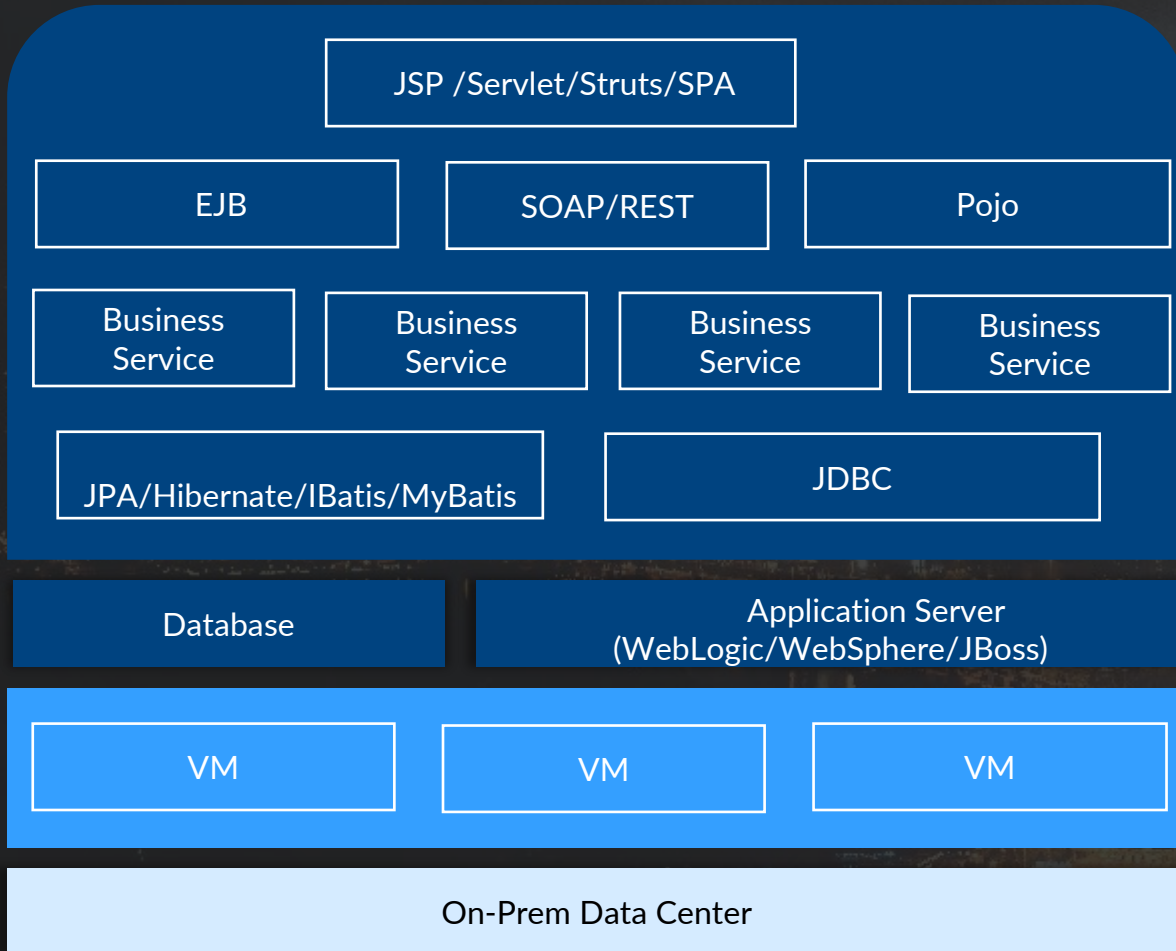

- Application availability dependent on container/serverless platform
- Application scalability increasing by micro service instance
- Cloud Native Architecture

# Java Application Cloud Transformation
