

DATA NOW

Data Enablement. Re-Imagined.

Struggling to access your company's data?

Unlock all the data you need. **Instantly.**

DATA NOW is a single gateway that instantly unlocks every piece of data within your organisation through a simple search.

Get any data you need, labelled and ready-to-use from anywhere, anytime. Just search and access.

No need to need hunt data down, wait for approvals, copy or move any datasets. Just login and search for the data you need.

Imagine the ability to effortlessly use insights faster than your competition. Installs in minutes. No migrations necessary.

Find what you're looking for

Don't pick between the cloud and your on-prem or legacy systems - we've got you covered for both.

We connect your users to your data. No big data migrations, no one-size-fits-all. It's still your data, but at it's full potential.

Govern from a single control panel

We give you a single control panel to make your complex data governance tasks easy.

From global-scale data sharing rules to internal business policies; we've got your back.

Access all your data

Find new insights and explore your data through the Data Now dashboard, or jump right in where you left off with your favourite BI tooling.

DATA NOW

Data Enablement. Re-Imagined.

How it works

Installed in minutes - we cut through the noise to instantly solve the three the biggest problems for any data estate

Find

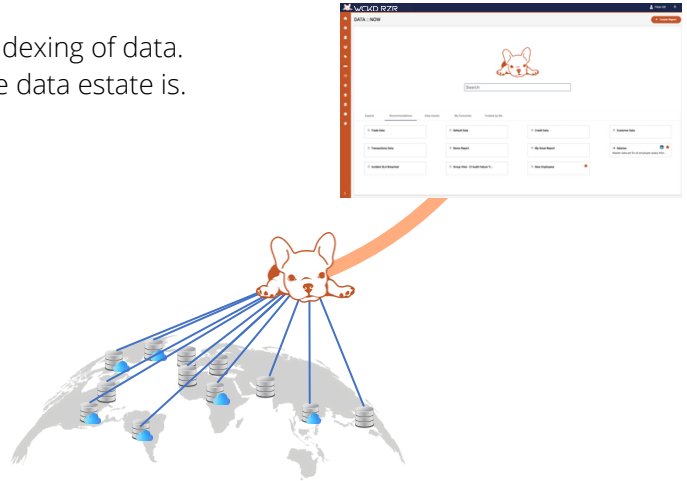

- AI-powered Intelligent Indexing accelerates the labelling and indexing of data.
- Connects to any and all databases; no matter how complex the data estate is.

Govern

- Central application of field-level data policies controls.
- Automated governance down to the field level.

Access

- Instant searchable access to *all* your data, labelled and unified, regardless of where it is stored - under your desk, in a Data Centre or in the cloud.

Example Data Flow

- 1 A user makes a query directly in DATA NOW using standard industry tools.
- 2 DATA NOW cross-references the data request against fully dynamic governance rules.
- 3 DATA NOW draws down just-in-time compliant views of data, cloaking fields in real-time where required and returning the results to the user.
