

Passport 360

COMPLIANCE PROCESS AUTOMATION PLATFORM

Passport 360 consolidates critical risk management data and automates processes to give you a simple way to manage critical compliance processes effectively. Passport 360 frees up your safety teams by allowing for simple management by exception and gives HR and Supply chains visibility into risk, safety and performance never seen before.

WHAT IS PASSPORT 360?

By creating visibility between the stakeholders jointly responsible for safety and compliance, risk outcomes are improved. Greater ownership by your supply chain with automation that slashes time to comply makes the experience more user friendly and easy to understand. Improved time to comply reduces standing time and improves productivity.

WHY CUSTOMERS USE PASSPORT 360

- ✓ Consolidated view
- ✓ Automate processes and alerts
- ✓ Shift responsibility to data owner
- ✓ Reduce risk
- ✓ Save time and money

INCREASED VISIBILITY

- Unique dashboards allow users to manage their view
- Advanced data analytics gives insights never visible before
- Bottlenecks in the process can be identified and corrected quickly
- Decoupled record allows contractors to manage their own data and take it with them

EASY TO USE

- Automation of processes makes compliance simple
- System workflows automate the approval process in real time across any device
- User friendly interface is easy to understand and navigate
- Proactively manage compliance

SEAMLESS INTEGRATION

- Integrates directly with current systems (e.g.: Microsoft, HR, supply chain and ERP systems)
- We pull critical information out of all current systems used to reduce fiction for your users
- Consolidate all relevant information on your stakeholder, across multiple data points, into one holistic view

“Passport 360 allows us to manage our safety compliance seamlessly and by exception”

Marié Brits ROSProf, Pr. CHSA SHE Manager

PASSPORT 360 BRINGS TOGETHER CRITICAL COMPLIANCE INFORMATION IMPROVING RISK MANAGEMENT OUTCOMES

CONSOLIDATED VIEW

- See your compliance across multiple sites and projects in one consolidated view
