

Hyperautomation For Human Resources Process Automation

Say Good Bye to Manual Excel Work
& Say Hello to Smart Workplace

AutomationEdge's Hyperautomation for HR

Human Resources comprises document-driven time-consuming tasks or processes. Paper-based HR processes need employees to perform tasks that eat out their heavy chunk of time, effort and efficiency. However, AutomationEdge's Hyperautomation platform ensures that these paper-based daily activities are automated, which comprise autonomous processing of electronic forms without any error. With the power of robust technologies like RPA, AI-powered Chatbot, Integrations, Ready Automation Workflows, Intelligent Document Processing Solution, AutomationEdge's Hyperautomation swiftly performs and completes crucial administrative HR tasks like LMS courses, employee database maintenance and update, HR documentation like appraisal letters, salary slips, etc., processing job application forms, HR announcements and employee communication, etc.

What All does RPA do in Employee Management?

New Starters / Leavers

Attendance Records

Control Changes Position benefits, roles responsibilities etc.

Make The Onboarding Process Engaging with WhatsApp and AutomationEdge
