Azure Infrastructure Consulting

Our Azure consulting services focus on helping businesses optimize their infrastructure and migrate their systems to the Microsoft Azure cloud platform. These services include assessing current infrastructure, designing and implementing cloud solutions, managing resources, and ensuring a smooth migration process.

We focus on the 8 design areas defined in Microsoft's Cloud Adoption Framework (CAF):

1. Azure billing and Active Directory Tenant Management
2. Identity and Access Management (IAM)
3. Network Topology and Connectivity
4. Resource Organization
5. Security
6. Management
7. Governance
8. Platform Automation and DevOps
