What is the Yammer Wall App?

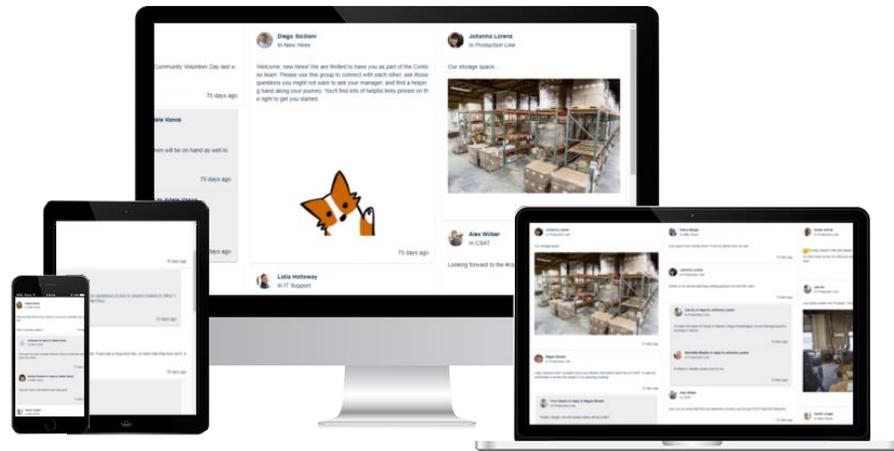

Typical customers are organizations using the Social Enterprise Network Yammer.

It collects specific Yammer Content and streams it to the registered clients.

The content updates automatically or when scrolling down.

Yammer Wall Benefits

Display your social stream wherever you want and stay up to date with the latest topics.

Yammer Wall works for every organization. Adjust your stream to your needs and configure the desired channels with one click.

Display the latest posts and all comments as logical threads in a clear design of your choice.

Secure Administration: sign-in with an entitled M365 account and configure which groups shall be shown in the Yammer Wall App on multiple clients.

Yammer Wall Features

Posts and comments are displayed as logical threads.

Stream selected Yammer conversations to various, multiple devices.

Customize the layout of your stream and choose between single column and multi column fully responsive design.

Images and Office attachments are shown in your stream as well.

Decide which groups should be streamed to your audience.

The online backend allows to configure the Yammer Wall App easily. The cache is organized with self-maintenance.

Diego Siciliani
In New Hires

Welcome, new hires! We are thrilled to have you as part of the Contoso team. Please use this group to connect with each other, ask those questions you might not want to ask your manager, and find a helping hand along your journey. You'll find lots of helpful links pinned on the right to get you started.
