

As people work in new ways, it has become more difficult to stay connected, particularly when it is necessary to regularly collaborate with colleagues. A large majority of employees report declining wellbeing while seeing an increase in work demands. Every day, one hour is spent to find the right and necessary information. Due to all of this, CEOs worry about attracting and retaining key talent and skills and see this as a barrier to future success.

Atos Microsoft 365 Collaboration VIVA enables organizations to create a thriving culture with engaged employees and inspiring leaders with the expert support of Atos.

Rolling out M365 Collaboration VIVA will help:

- **Employee engagement-** digital training programs boosted employee engagement and performance
- Employee Satisfaction- employees say they would stay at a company longer if it invested in their learning and development
- Employee Retention-Highly engaged employees are 12x less likely to leave their company than those who are not engaged
- **Profitability** Organizations with highly engaged employees have greater profitability
