Azure Governance Workshop
Product Information

ARXUS

Business Case

Why a governance workshop?

Customers are struggling with scaling a good "day-by-day" practice in the Azure, with the following effects as a result:

- The Azure bill getting higher by the month.

- Tradeoff speed vs stability in your projects on Azure while competitors are catching up

- Unmanageable setup and/or shadow IT

- Lost time in medial management tasks and increasing risks for compliancy

- Higher risk for security breaches and unwanted access

- Burnout of key personnel because of constant pressure to have the right Azure expertise

ARXUS

Azure Governance Workshop
on site, tailored to customer specific situation

2-way communication workshop with demo's, whiteboarding, ...

Topics include:

- Cloud Adoption Framework
- Management Groups
- Policies and Blueprints
- Naming Standards
- Role Based Access Control and Security
- Cost Management

Deliverables are a governance architecture, process, and a roadmap with next steps to take in your Azure Governance journey
