Play your own music, directly from the cloud

Play music that is stored on your cloud, directly in your browser or on your phone. Whether you are at work or on holiday, your own music collection always travels with you.

Go to the web player

The screenshot shows the Astiga music streaming application interface. At the top left is the Astiga logo and a search bar. A navigation menu on the left lists options like Home, Playlists, Apps, Premium, Support, Library, Overview, Albums, Artists, Genres, Songs, Podcasts, Library management, and Storage. The main content area is titled 'Albums' and features a grid of album covers including 'Scott 4' by Scott Engel, 'Sigh No More' by Mumford & Sons, 'Simple Things: Special Edition' by Zero 7, and 'Since I Left You' by The Avalanches. At the bottom, a music player is visible, showing the track 'Intro alt-J / An Awesome Wave 1060k...' with playback controls and a progress bar.

A music streaming service for your own music

Our belief is that ownership of your music library is important.

Control your own library

Simply upload your music to a cloud storage service of your choice and connect it to Astiga.

Connect to your music

No matter whether you use Google Drive, Dropbox, WebDAV or your own media server.

Wherever, whenever

You can then directly play your music back wherever you are.

Supports (nearly) everything.

Astiga supports a plethora of cloud storage services in addition to standards-based access like WebDAV and SFTP. If it exists, it is probably supported!

Let's get listening!

Astiga ❤️ pCloud

Don't have your music in the cloud yet? Don't worry! Astiga can automatically create and set up a pCloud account for you.

Disclosure: Astiga earns, at no additional cost to you, a commission if you buy something on pCloud through Astiga.

Cloud music storage on-demand

When signing up for Astiga, tick the "I also want to sign up for pCloud" box, and Astiga will register both your pCloud and Astiga account, and add your pCloud storage to Astiga. The only thing you'll have to do is upload your music to pCloud.

Subsonic server

Astiga is a Subsonic server, allowing you to use Astiga with Subsonic apps for Android, iOS, Windows, macOS, Linux and more.

Library support

Generate your music library, allowing you to easily access your albums, artists and genres. Searching is supported as well.

Mix playlists

No need to restrict yourself to one cloud provider; you can easily mix audio from multiple sources and save them to playlists.

We care...

...about your privacy

Astiga does not share your information with third-parties. You are the customer, not the product. The only ones with access to your usage of Astiga are Astiga and the cloud storage providers that you use. The only information we share is the information you choose to share.

Works wherever you are

Astiga works in your browser and on your phone, but there are many other places where you can use Astiga too.

Android Auto

Easily play music while driving.

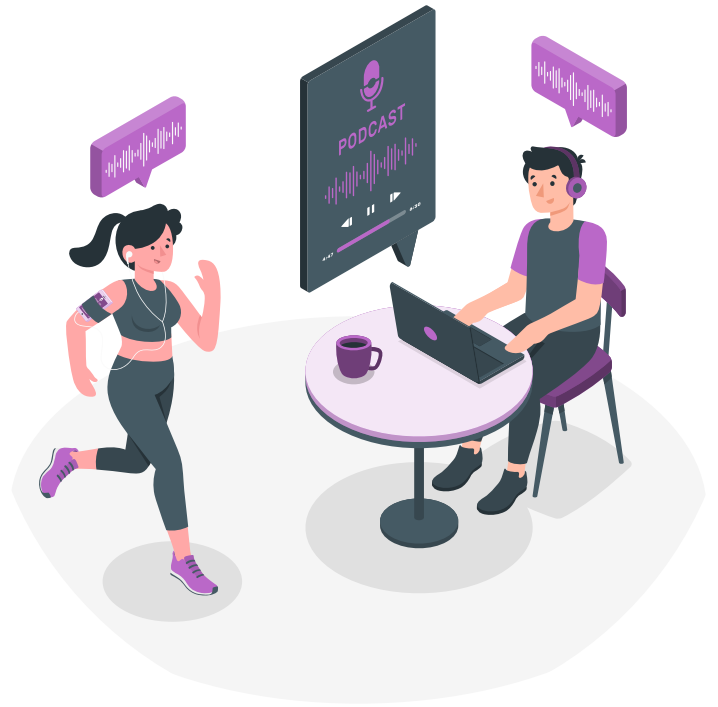

Chromecast

Cast music to your TV or audio device.

Google Home

Play your music with voice commands, without using your phone.

We care...

...about our planet

Astiga is hosted in Germany, and is green by design. The data centre used by Astiga is ISO 14001 and ISO 50001 certified, and uses 100% guaranteed of origin renewable energy [\(🔗\)](#), hence minimising our contribution to global warming.

Works in all modern browsers

WAV, MP3, AAC, OGG, Opus, WebM, ALAC and FLAC are all supported in Chrome, Edge, Firefox, Opera and Safari.
