Eviden's NetZero for Microsoft Sustainability Manager Implementation

In today's progressive landscape, sustainability is no longer a choice but a necessity.

Eviden, in partnership with Microsoft, offers the Microsoft Sustainability Manager Implementation service. This empowers clients to make measurable strides in environmental impact and organizational sustainability.

What We Offer

Eviden leverages Microsoft's Sustainability Manager to unify data, streamline processes, and foster transparency in a landscape rife with sustainability challenges. We offer to define your sustainability strategy at various maturity levels of your sustainability project, guiding you toward lasting environmental and organizational sustainability.

We begin with envisioning workshops and assessments, crafting a solution roadmap, and providing cost analysis reports.

Establishing a Sustainability CoE, we develop MVP prototypes, optimize models, and conduct rigorous testing.

We oversee wider rollout and pilot implementations, integrate seamlessly into existing systems, and ensure ongoing monitoring and performance management.

How it Works

RECORD:

- Automated data collection with prebuilt connectors
- Consolidate data from disparate sources
- Leverage prebuilt methodologies to calculate scope 1,2 and 3 emissions

REPORT:

- Design Data Analytics, visualization, and dashboards
- Extract actionable insights to enable performance tracking
- Configurable preparatory reports

REDUCE:

- Goal setting and scorecards
- Seamless collaboration with Microsoft Teams within MSM
- Integrated sustainability insights

Execution Strategies and Solutions

Microsoft Sustainability Manager empowers organizations to turn data insights into action and reduce environmental impact

Customer Outcomes

The client was able to set up the Sustainability Platform foundation for their reporting exercise to the Corporate Sustainability Reporting Directive (CSRD)

Customer Success

Company: Fortune 500 Insurance client

Solution:

Eviden made a scope discovery of this engagement with the client. Then, a "Proof of concept" was developed to establish how the prototype will work. A continuous adoption knowledge transfer started after the pilot phase. Newer features were introduced by integrating continuous updates so that the solution is up to date with all capabilities

Outcome:

- Sustainability Data Lake automated CSRD-compliant reporting for environmental indicators and reduced manual efforts and errors.

- Demonstrated (semi)automated processing from data source to MSM ingestion.

- Served as a data staging area, enabling automatic data ingestion into MSM.

Eviden is your preferred digital, cloud, data, and security partner to help you realize your digital future. Together, Microsoft and Eviden are expanding the possibilities of data and technology, now and for generations to come.
