Cybersecurity Assessment

Understand your readiness for common security threats

Engagement highlights

Identify a baseline of your organization's cybersecurity policies

Use Microsoft Security capabilities to generate an overview of areas of focus

Explore the types of sensitive information within the Microsoft 365

Analyze your cyber-risk and cloud security posture through assessments and on-going dynamic monitoring

Develop joint plans and next steps

Ransomware and data leaks from insider threats are the most prevalent security risks that organizations are facing.

Over 98% of the attacks can be prevented by having basic security hygiene processes and solutions in place.

How aware is your organization of current risk in the environment and activities that can help to strengthen your cybersecurity posture?

Improve your security awareness with a Cybersecurity Assessment

Get a jump start on improving your security posture, wit**h Microsoft Security Solutions**, by participating in a Cybersecurity Assessment.

In addition, receive the value-added benefits by leveraging TrustElements platform. That provides dynamic cyber risk monitoring and assessment, utilizing advanced risk models to accurately quantify potential losses.

Gain awareness of the current state of your security aligned to industry benchmarks, and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

Why participate?

This assessment is designed to help you understand the importance of security and how to protect your organization from potential threats. By participating in this engagement, you will:

|			
Gain an understanding of common threat scenarios	Receive actionable next steps grounded in industry accepted benchmarks	Get a holistic view of organizational defenses against common threats	Better understand how to accelerate your security journey using the latest Microsoft Security tools

What to expect:

Better understand, prioritize, and address cybersecurity and data risk vulnerabilities .
Prioritize and mitigate potential risks, with:

- Analysis of organization's alignment to common cybersecurity goals and improvement actions designed to help strengthen security posture against human operated ransomware and data leaks from insider threats.

- Visibility into to your endpoint health and Microsoft 365 data using scans from Microsoft Security tools.

- Understanding of not only cybersecurity risks, but how to effectively prioritize them using a data driven model

- Long-term recommendations about your security strategy, with key initiatives and tactical next steps.

Pre-Engagement Call	Cybersecurity Readiness Assessment	Scope and Definition Meeting	Vulnerabilities and Data Security Exploration	Results Presentation	Engagement Decommissioning

Who should participate
