

HyperNet Platform

HyperNym Solution

An IoT Solution Provider Company

SaaS Platform For Your IoT Use

Cases

14 Pre-Build Use cases across 4 industry pillars

Strong Device Management and Device Provisioning Mechanism

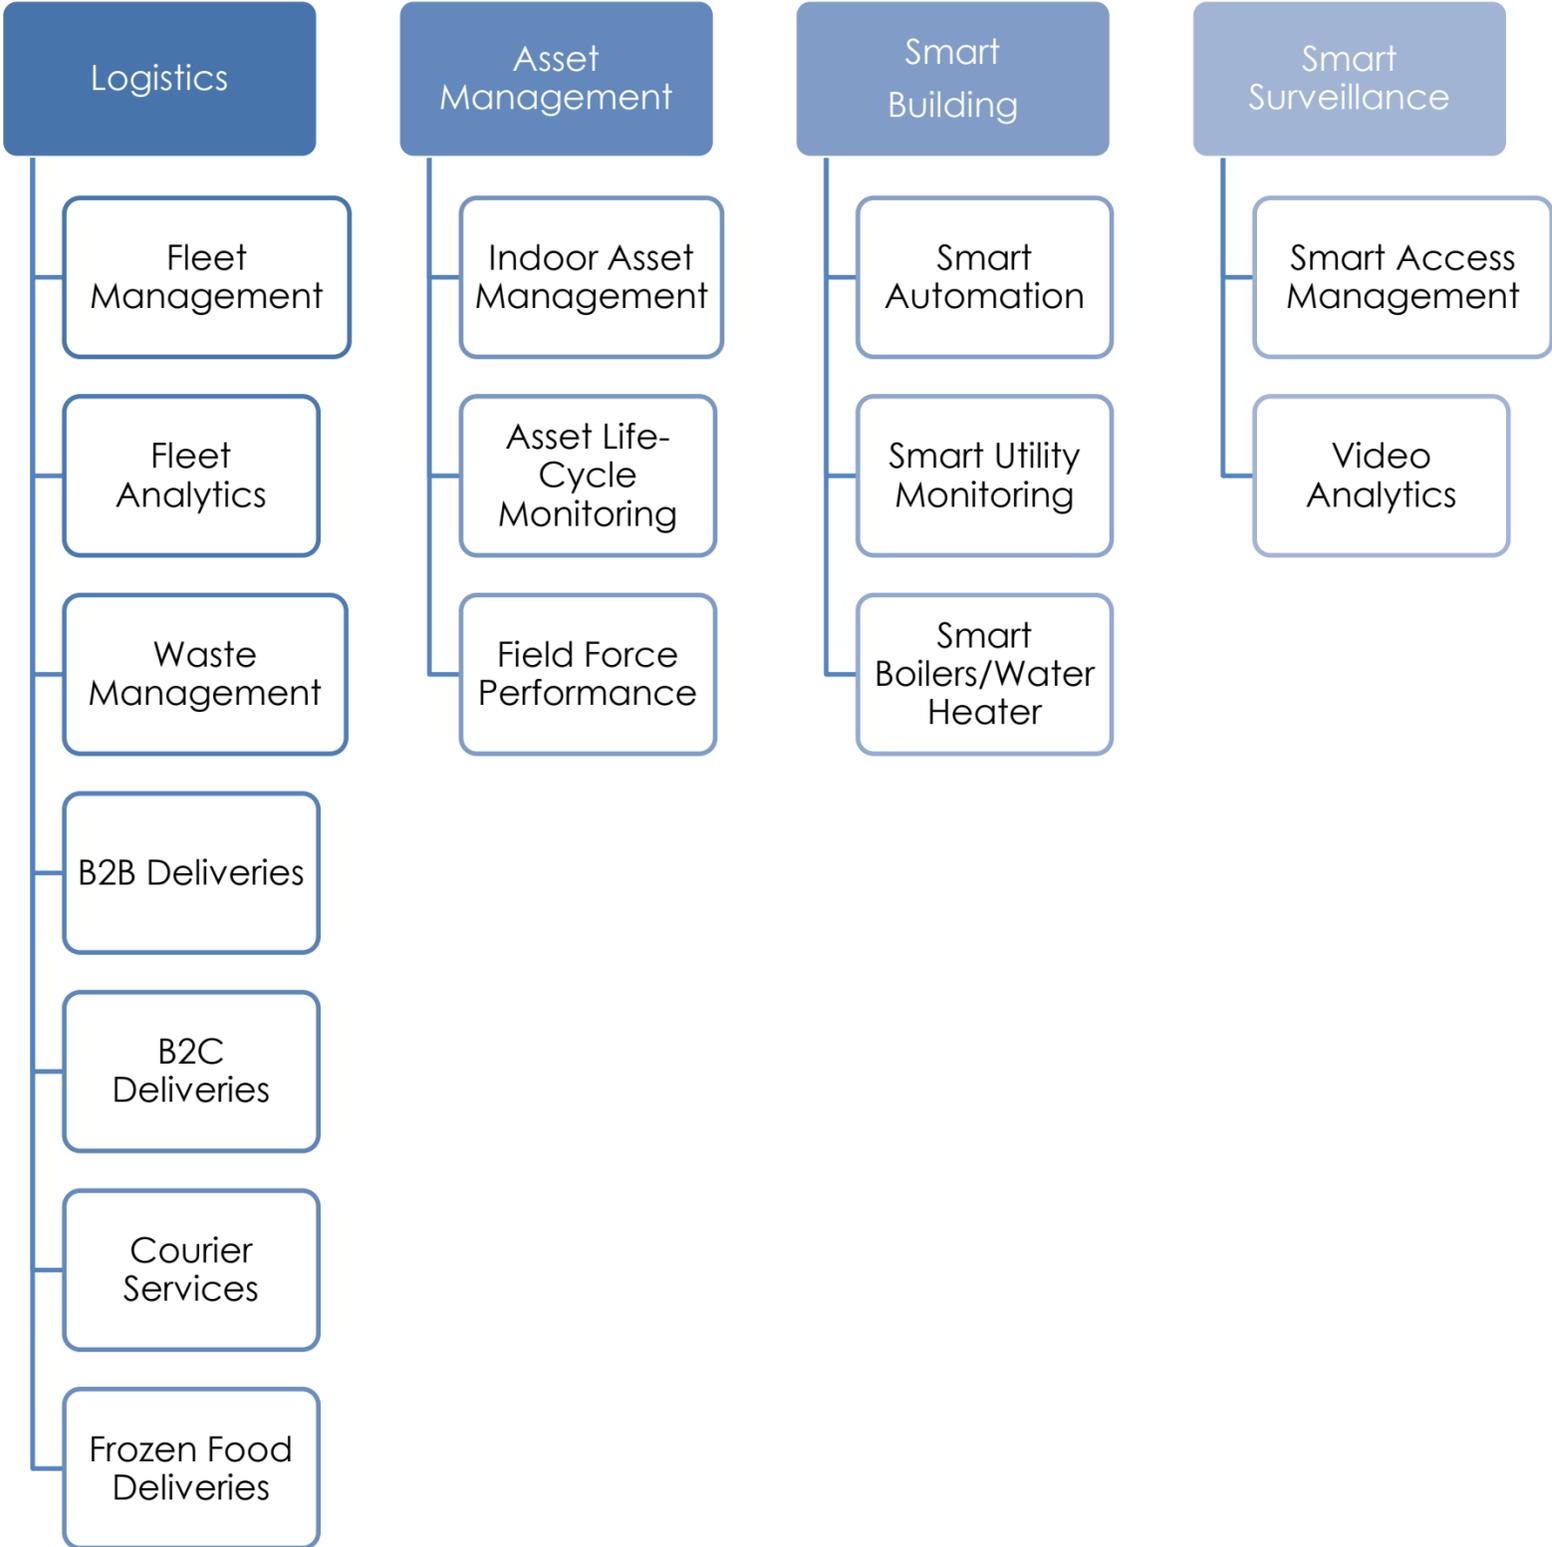

Unique Data Lake based Architecture to maximize the utility of Data across all uses

We wrote our own industry plugins .

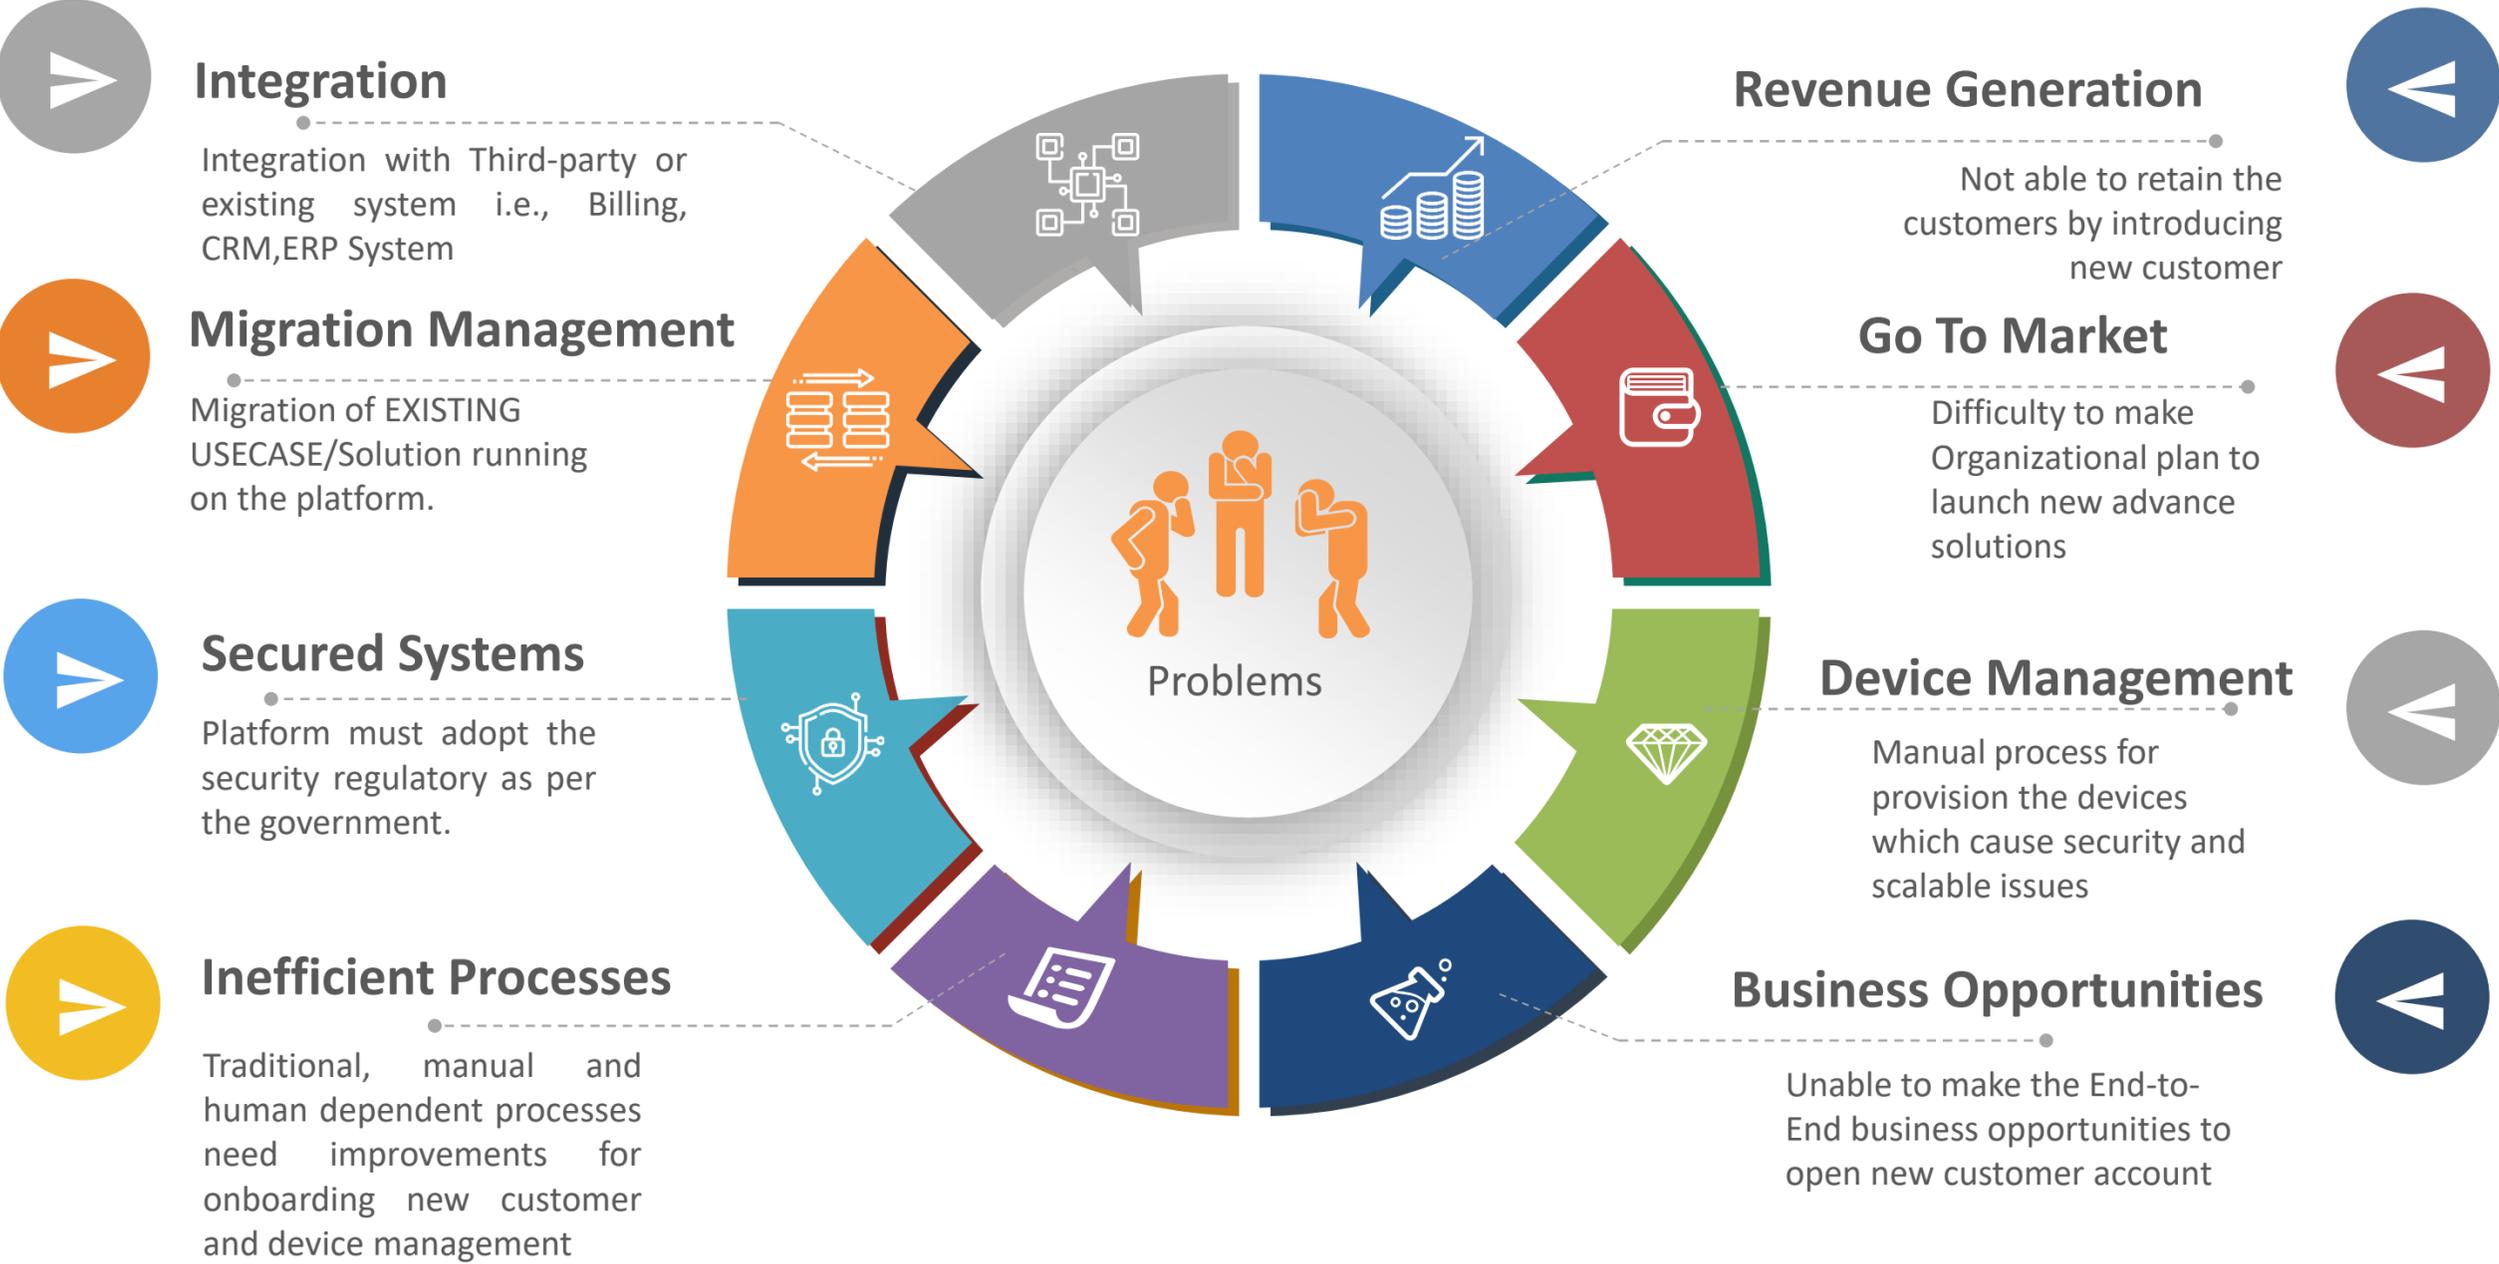

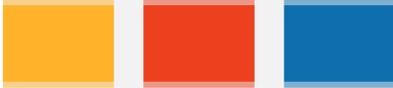

We build great sensor partners /hardware partners. With our own experts of Firmware

Build new use cases using existing API libraries

Pre-Built Applications across following verticals on HyperNet

Telecom Industries Problem

HyperNym Telecommunication Customer

HyperNym IoT Customer References

ELARABY

Telecom after Adopting HyperNet

With HyperNet's adoption a whole new menu of VAS(14 use cases) available to upsell or net new customer

Increased data usage will impact on revenue increased.

Opens new industries , Universities, Courier Companies, Banks

without increasing technical teams , as HyperNym offers managed service and 24/7 support

Ready to Launch -Minimum Go to Market Time.

Autonomous SaaS offering , NO Deployment times.

Relationship Models And Service Offerings

Cobranded or White Label

IOL - Smart Waste Management

hypernymfzllc-4553301

Overview [Reviews](#)

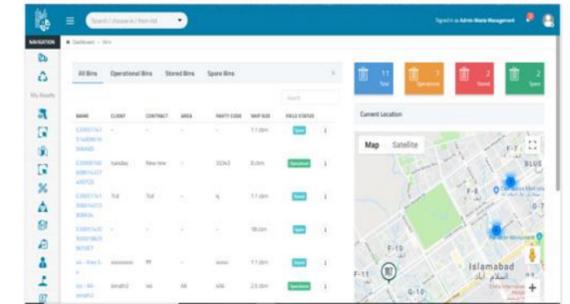

Smart Waste Management using IOT Technology with Artificial Intelligence & Machine Learning

Internet of Waste Management by HyperNym is a complete platform which helps waste management companies to manage not only their Fleets and Waste Bins but also integrate with their client management and billing solution. With the help of sensors & gateways we provide you real-time monitoring, territory allocation & an analytical engine to help you increase operational efficiency & reduce OPEX by curbing penalties incurred via generating timely alerts, recommending best pickup routes, automating everyday operations & more. This State of Art solution is on Microsoft Azure and use Artificial intelligence and Machine Learning to provide in-depth analysis and co-relations to give deep insight of operations.

What do we do others don't ?

Applications/Solutions are based on complete workflow and analytics for the business need

Industry Add ons such as Waste , Courier, Distribution etc

We provide complete solution i.e., Software and Hardware which is Solution as a service

AI-based Machine learning analytics based on real-time data or historical data

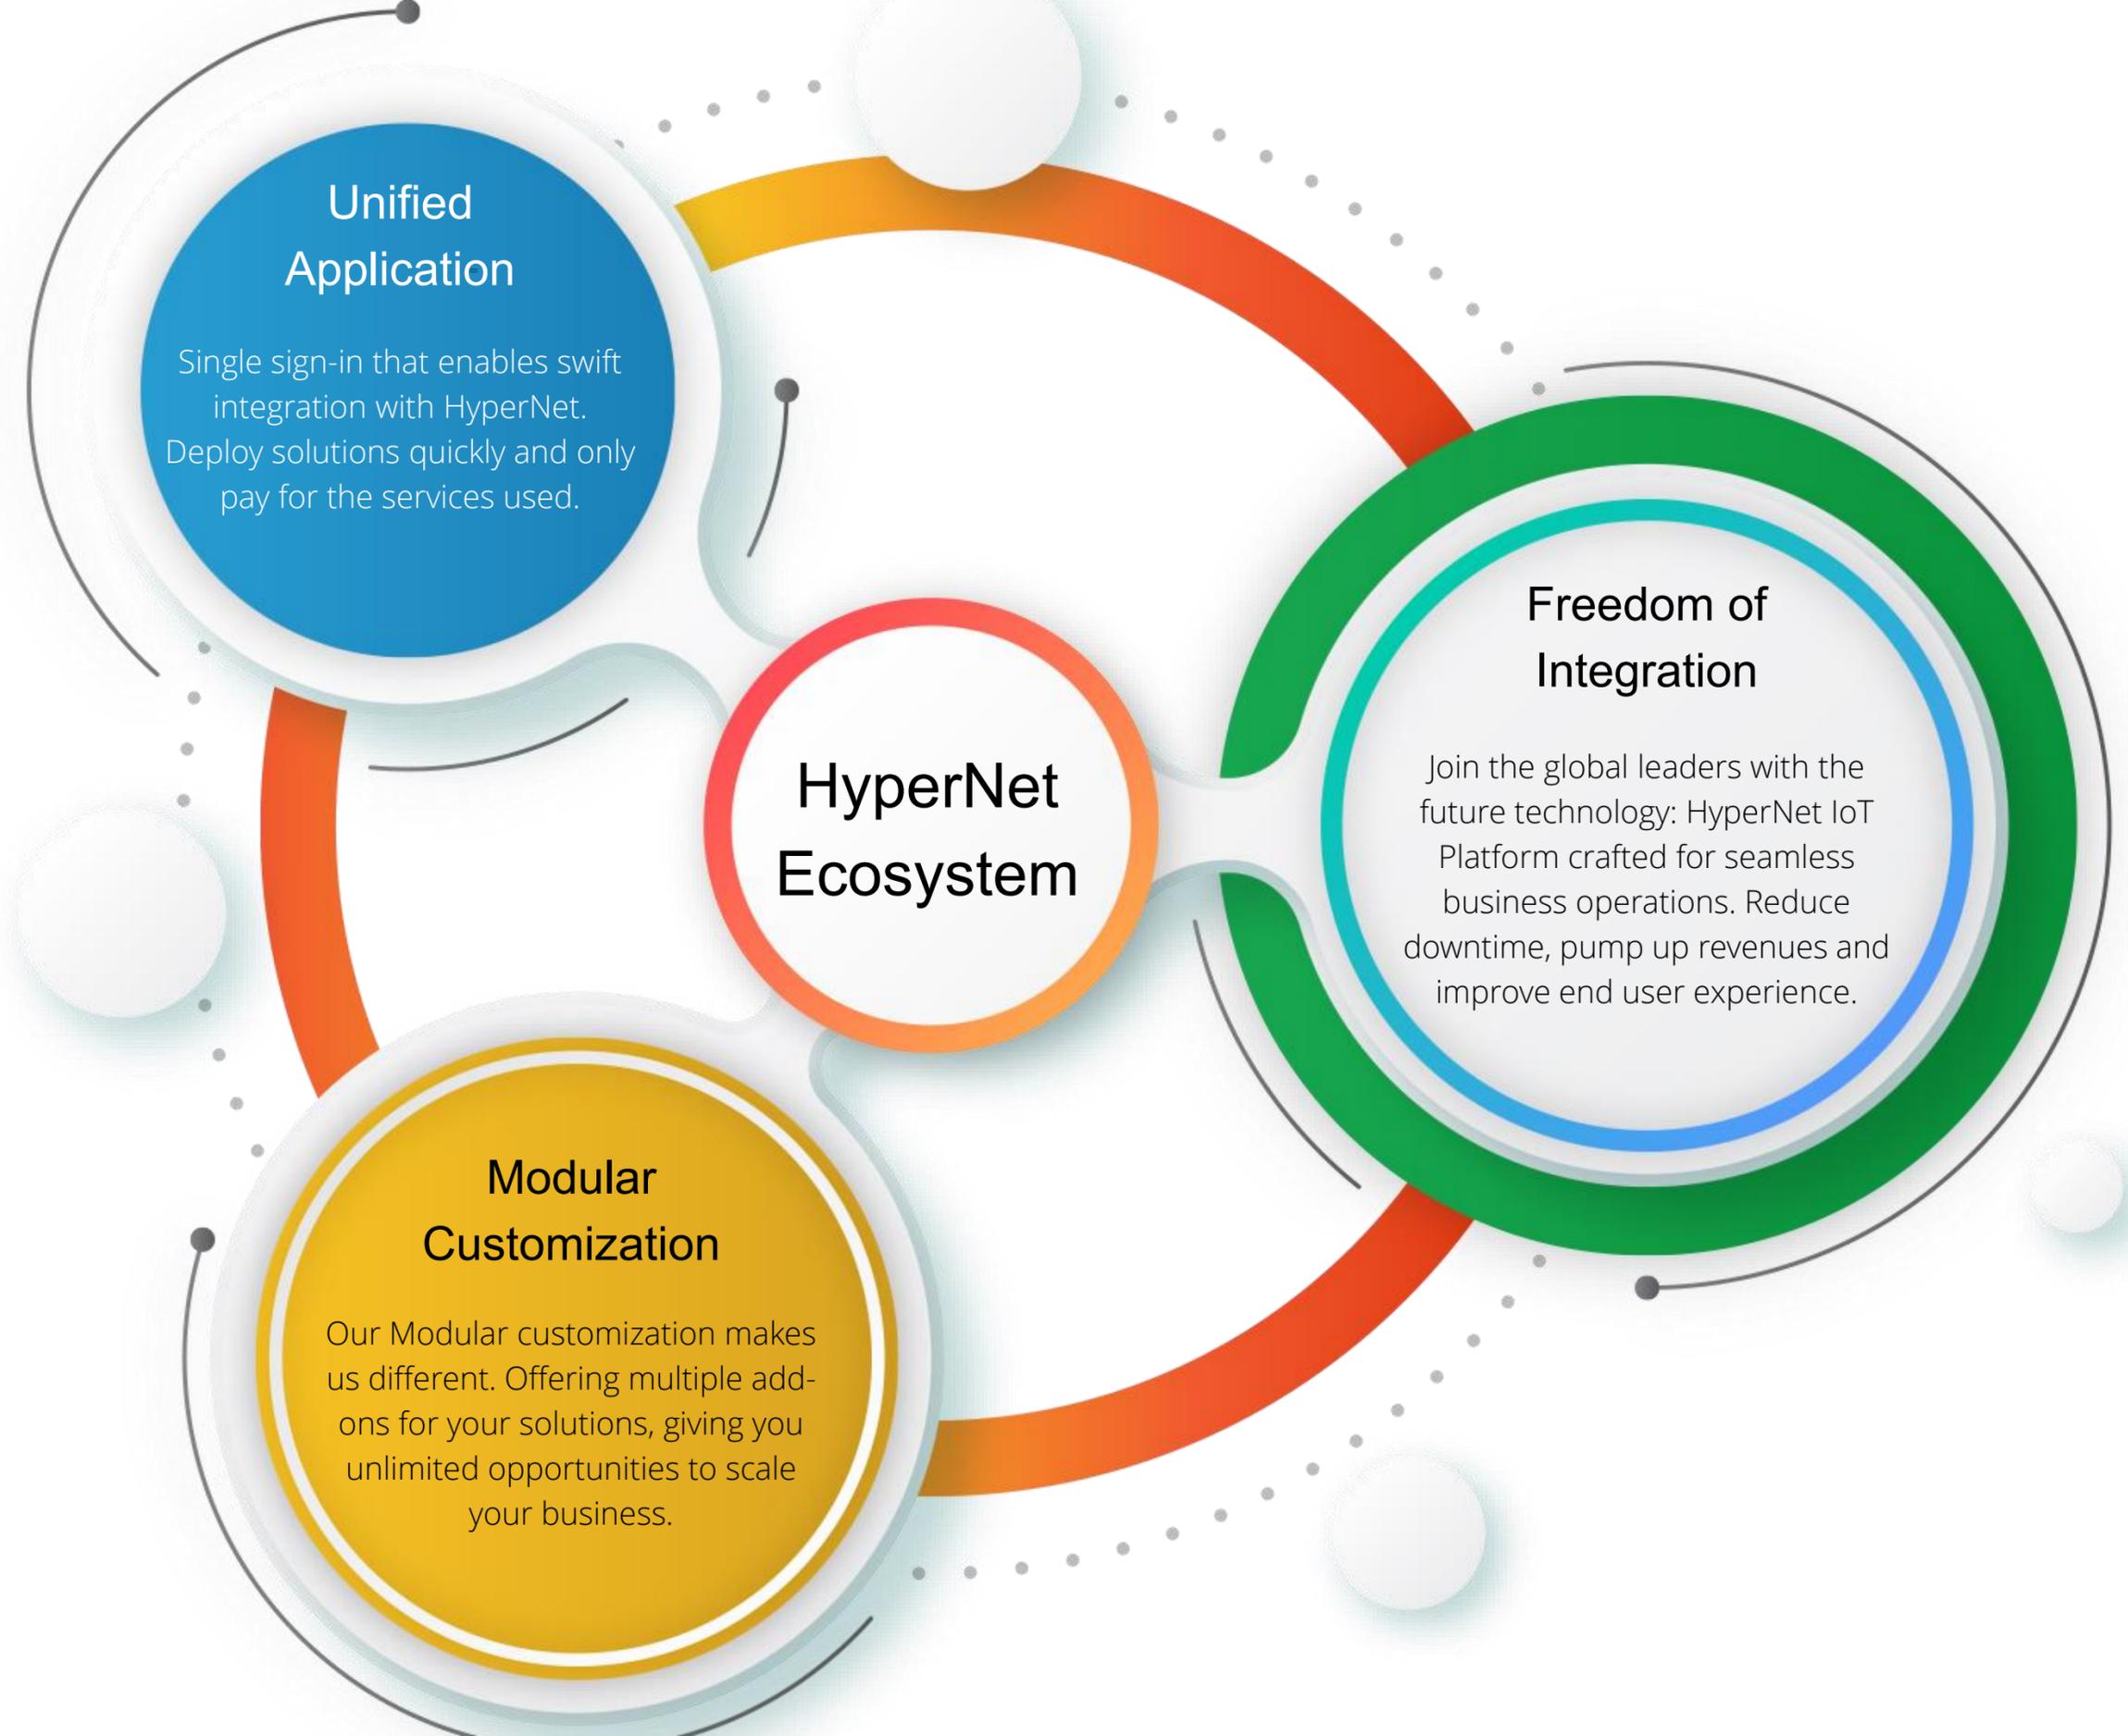

Reduce OPEX by providing real-time analysis and full visibility of business.

After adopting dependency on third party analytics or ERP remains there. For basic business needs.

Providing consumer or work force related business / consumer mobile apps.

Unified Application

Single sign-in that enables swift integration with HyperNet. Deploy solutions quickly and only pay for the services used.

HyperNet Ecosystem

Freedom of Integration

Join the global leaders with the future technology: HyperNet IoT Platform crafted for seamless business operations. Reduce downtime, pump up revenues and improve end user experience.

Modular Customization

Our Modular customization makes us different. Offering multiple add-ons for your solutions, giving you unlimited opportunities to scale your business.

Tailored Digital Solutions For Every Business
