

KEEP YOUR WORKFORCE ATTENTIVE AND SAFE WITH THE MOST ENGAGING INDUSTRIAL SAFETY APP

Promote safe behavior and provide real-time information to reduce the risk of industrial accidents

GOARC's Safety 4.0[®] Connected Worker is the first industrial Safety App designed for the connected operative. It brings GOARC's digital view of facility activities to the field or shop floor with a revolutionary convergence of personal and process safety that equally protects operatives and critical assets. Designed for use by company workers, operators, and subcontractors, GOARC's Connected Worker is a native Android/iOS mobile phone application that provides 24x7 access to real-time information about facility conditions and grants users the possibility of receiving online assistance in real-time. A gamification feature ensures that promoting safe behavior and motivating workers is easy and makes everyday tasks exciting and rewarding.

The GOARC Safety 4.0[®] Connected Worker turns a smartphone into a worker safety device. With dynamic forms that keep workers attentive and focused, and gamified daily tasks that promote safe behaviors and motivate workers, GOARC is revolutionizing occupational safety. Seamless audio and video communication across the facility ensures that safety officers and engineers can see what field employees see and can properly instruct workers in dynamic work environments. The ability to proactively report hazards in real-time ensures that issues are instantly acknowledged and dealt with.

The GOARC Safety 4.0[®] connected mobile worker app turns a smartphone into a worker safety device

- Native Android/iOS mobile phone app
- 24x7 access to real-time information on facility conditions
- Real-time online assistance
- Gamification feature to promote safe behavior

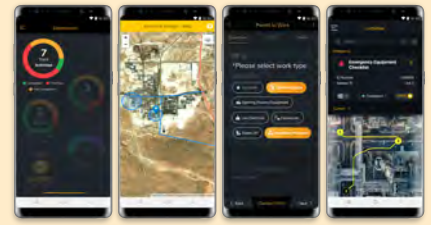

Dynamic work environment with real-time communication and data

- Seamless audio and video communication across the facility
- Digital view of facility activities
- Proactive hazard reporting in real time
- Adaptive to changing conditions
- Automatically stop permitted work if conflicts arise

Unique Visualization and Dynamic Personalized Routines

- Dynamic forms
- 24/7 guidelines and alerts
- Daily toolbox talks and training
- Encourage safe behavior and accurate reporting with gamification

ABOUT GOARC

GOARC is revolutionizing the practice of industrial safety for the Industry 4.0 era. Our Safety 4.0[®] platform uses artificial intelligence and other advanced technologies to gather unprecedented levels of real-time operational data to identify risk patterns and generate actionable intelligence and new safety routines that mitigate industrial accidents. GOARC offers a wide set of solutions to maximize safety and minimize risk.
