

ONE PLATFORM FOR ALL YOUR DIGITAL COMMUNICATIONS NEEDS

With Omnivex Ink you can quickly and easily share personalized, real-time information on any device with employees and customers and receive instant feedback from them. Whether it is business apps for mobile phones or real-time information on digital signs, Omnivex Ink provides you a platform to manage digital communications across your entire organization.

EXTEND INFORMATION TO EVERYONE'S FINGERTIPS IN THREE EASY STEPS

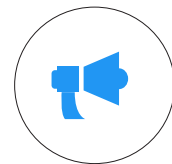

1. SELECT A TEMPLATE

Choose from a collection of ready-made templates to quickly design your mobile app or digital sign. Omnivex Ink has templates to suit all of your content and layout needs.

2. ADD DATA & CONFIGURE

Easily add your data and content, whether it is scheduling information, KPIs, wait times or any data important to your organization. Style to reflect your needs.

3. PUBLISH & SHARE

Quickly publish and share your mobile app or signage content with your co-workers and customers. Easily control who has access to your information.

CONTROL ACCESS

With Omnivex Ink YOUR data remains YOUR data. You maintain full ownership and control of everything at all times. All transmissions are encrypted and all data and content is encrypted at rest. Omnivex Ink puts you in full control over who sees your data and what they can do with it.

BI-DIRECTIONAL DATA FLOW

Data updates instantly when using Omnivex Ink. There is no need for a refresh button. You can push out updates and receive live feedback as it happens. Easily set up crowd collaboration on any source of data. Monitor who is currently using your data and track changes they are making.

"Wow! This is a strategic game changer for our entire business."
