

## Overview

# Suswagath – Visitor Management System

## The right way to do visitor management

In corporate spaces today, the outdated paper log is still the norm for visitor registration. Despite its perceived quickness, this method lacks security, exposing visitor information for all to see. Suswagath introduces a transformative solution, automating the visitor management process for a more professional, secure, and compliant check-in system.

Suswagath offers a user-friendly experience for both administrators and visitors. Utilizing Azure services ensures robustness, scalability, and security, making Suswagath the ideal solution for efficient visitor management within your premises. Upgrade your visitor management to a digital standard that not only ensures security but also provides a positive experience for both administrators and visitors alike.

## Key Benefits
