

BizTalk Server Health Check

Get the Most From Your BizTalk Server Investment!

Are you running an early release of BizTalk Server and wondering if you are getting the most from your investment?

Do you want to stay with your current release because migration is not yet feasible or may not seem necessary at this time?

Do you worry about getting the best support possible?

Learn how to maximize BizTalk server's full potential, at any time, with a BizTalk Server Health Check.

Feel Reassured With a BizTalk Server Health Check

Microsoft BizTalk Server Health Check is the first step toward safeguarding optimal BizTalk performance. TwoConnect's team and the Health Check can help you identify key areas of potential risk, provide quick and lasting solutions, and offer support that will keep your business running smoothly – for as long as you need it.

At the heart of the Health Check is an assessment of your BizTalk Server infrastructure and operational processes.

This assessment collects:

- Data and statistics to identify security risks and configuration concerns
- and then issues summary reports on the findings that provide recommendations for solutions to problems

Your TwoConnect engineer can help you analyze areas of concern and implement short- and long-term solutions.

The entire assessment and reporting takes approximately five days and can be accomplished either onsite or remotely. It is that easy to gain peace of mind with your BizTalk Server environment.

The Benefits of a BizTalk Server Health Check!

Maintain maximum efficiency

Gain from the knowledge and practices of Microsoft, the BizTalk community, and TwoConnect's extensive in-field experience. Access to in-depth expertise helps you reach your highest BizTalk Server performance and achieve business goals.

Use practical recommendations

The health check provides practical solutions for all identified risks in operations, configuration, and architectural issues to ensure you get the most from a BizTalk migration when ready.

Reduced costs

Uncover vulnerabilities in the BizTalk Server infrastructure and operational processes. Identify causes, not only symptoms, and take a proactive approach to issues before they impact users and increase costs.

The TwoConnect Connection

TwoConnect provides premier 24x7x365 BizTalk Support Services and Maintenance solutions for as long as you need it, including:

- 24/7 Emergency Support to identify problems and resolve them.
- Proactive monitoring of your environment so problems are identified and managed before they occur.
- Configuration of development environments that protect your live setup during modifications.
- Database monitoring, message tracking, and alerts.
- Continuous security monitoring to ensure that your environment is never vulnerable.
- Performance tuning to keep your environment running at its best.
