

Data Security Engagement (Purview)

Protect and manage data wherever it resides within your organisation, and maximise your E5 licensing investment. In this engagement, our data privacy consultants and Microsoft security specialists identify data security and regulatory risks in your environments, and how you can remediate them with Microsoft Purview.

Common Challenges

-  **No Unified View of Data Assets**
Without the right implementation, it is challenging for organisations to create a unified view of their data assets and their relationships.
-  **Limited Resources and Expertise**
Many organisations lack security professionals with deep experience in deploying, configuring and managing Microsoft Purview.
-  **Risk of Data Misuse**
Without a unified view of data assets, organisations are also at risk of data misuse (both accidentally and as part of a malicious disclosure).
-  **Regulatory Challenges**
Regulatory requirements for data privacy can be complex and hard to navigate.

How Bridewell Can Help

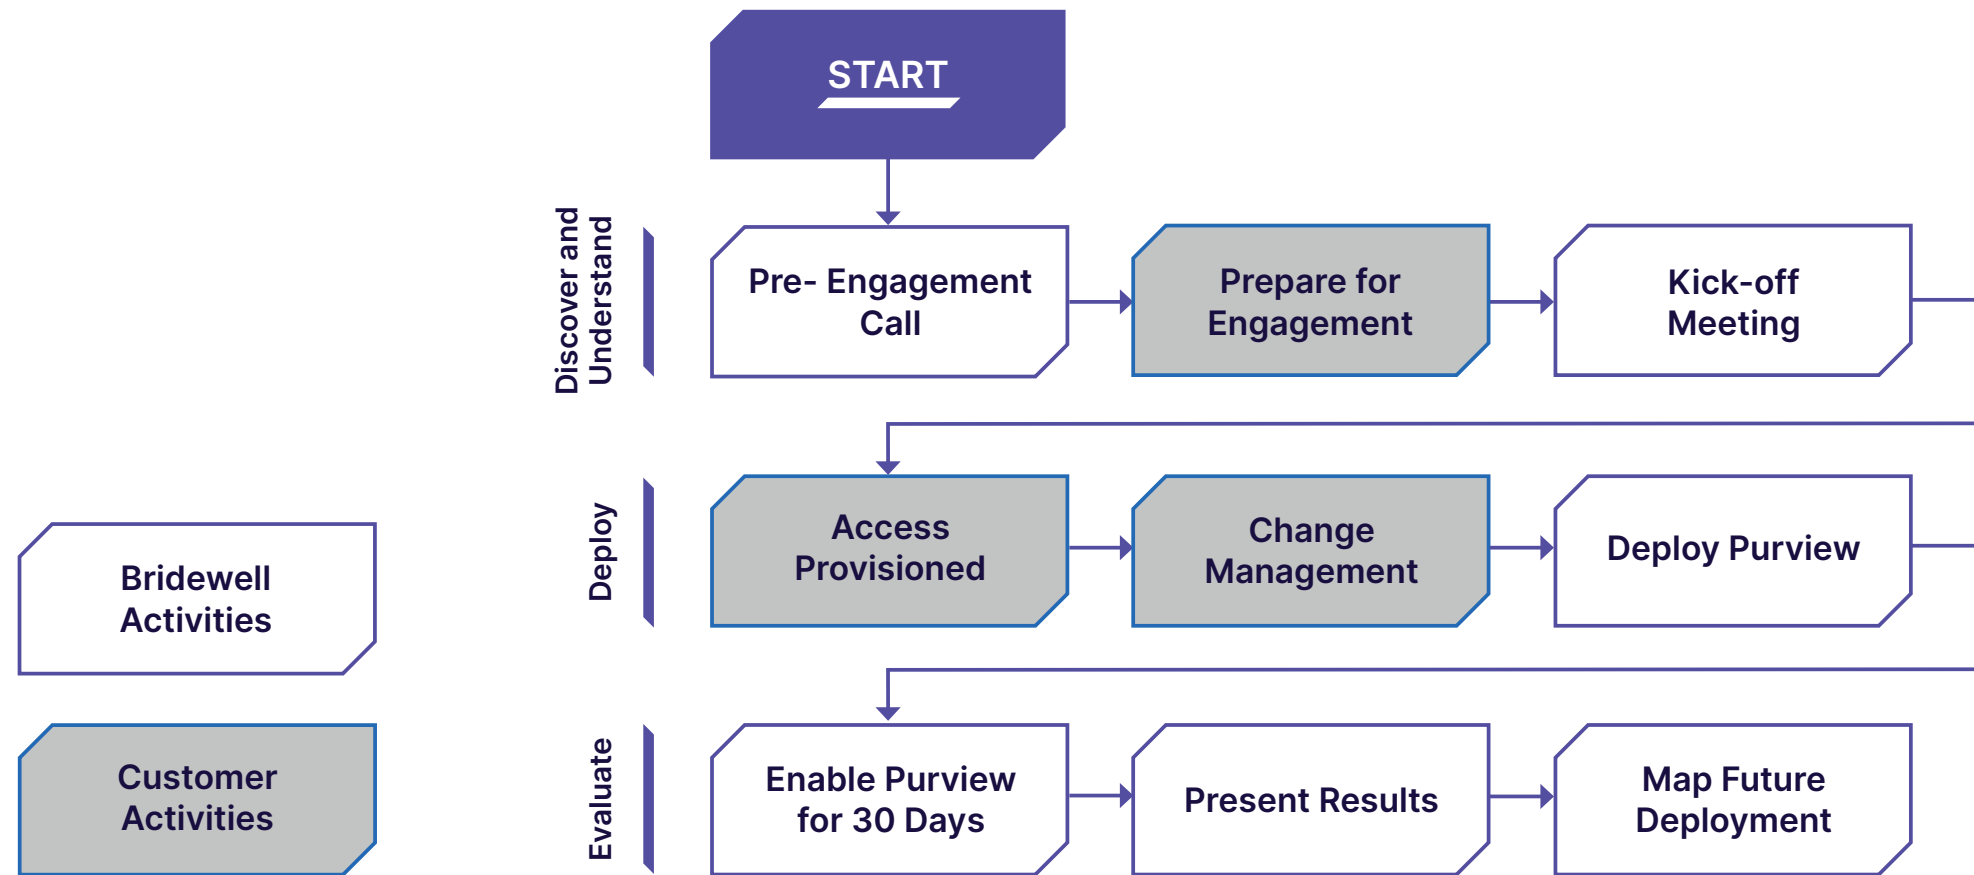

-  **Identify Current Ongoing Risks to Your Data**
Our data privacy consultants will assess your current data privacy programme for any ongoing risks.
-  **Identify Risky User Behaviour**
Our consultants will also identify any user behaviour that may impose data security risks or data breaches.
-  **Improve Your Compliance Posture**
We will provide assistance in meeting requirements for regulatory compliance and industry best practice.
-  **Learn How to Use Purview to Reduce Data Security Risk**
We provide clear guidance on how you can use Purview to remediate and prevent data security risks.
