Introduction

Our Methodology

Do It Once. Do It Right.

Volt's project management discipline has been developed based on the learning from more than 250 Microsoft Dynamics deployments and 30+ years of experience.

Volt Technologies was founded with a focus on delivering high quality Microsoft Dynamics 365 Business Central implementations. Our implementation methodology is designed with a focus on your business needs. We specialize in providing fast and affordable implementation services tailored to fit the needs of small to mid-sized businesses.

We understand that every business is unique. Our team has experience across all industries and will ensure that Business Central is a perfect fit for your organization.

Our Principles

- Cloud deployments should aim for out of the box functionality for smoother, more frequent updates.
- Minimize "throw-away" integrations and prioritize standard functionality to reduce risk and save money.
- Continuous exposure to the system for end users helps train them in small doses, improving adoption drastically.
- Design completeness and Go-Live readiness, accurate task tracking to help everyone stay on track.

What We Do

Our Services

Whether you're exploring your options for new business platforms, or ready to get started, Volt Technologies is your trusted business partner in taking your organization to the next level. We put our knowledge and experience to work for you and deliver more than just software solutions - we can help transform your organization to deliver future growth.

IMPLEMENTATIONS

Cloud-based ERPs have changed implementation strategies and best practices. We have worked hard over the past 30 years to develop a project methodology that ensures project success.

UPGRADE

If you're running QuickBooks, Microsoft NAV/GP then Business Central is perfect for you. The jump from these applications come with significant gains and opens the for a cloud transformation that we promise will increase your business agility.

TRAINING

End user adoption is the main key to implementation success. From the core project team, to the IT team, and everyone in between, your end users will understand their role, function, and their part in the big picture.

SUPPORT

Looking for support after the Go Live? That's what we're here for. Our solution architects are experienced and we'll be there for you every step of the way, even after implementation.
