

Well-Architected Framework Review

1 Day Assessment

The Advania Azure Well-Architected Framework Review provides a guided Azure application assessment based on architectural excellence, with expert recommendations, and an outcome-focussed remediation plan.

Advania is pleased to offer our Well-Architected Framework Review (WAR) Assessment for applications hosted in Microsoft Azure. Advania's one day interactive assessment leads key stakeholders responsible for developing and supporting applications in Azure, through a process to maintain and improve the quality of your application in Azure.

The team at Advania will work with your organisation to deliver:

Stakeholder and Scoping Engagement

- Discuss objective, scope, format, and value of the assessment to your organisation
- Gather high level customer context and identify the application as a potential candidate for the assessment
- Arrange the technical review activity and ensure scope, objectives, format, and deliverables are understood by the customer
- Confirm application for assessment, logistics and attendees

Assessment

Choose from one of five pillars of architectural excellence; assess the application through the lens of the relevant pillar; provide recommendations to optimise the application. Select the key pillar and application to be reviewed prior to the assessment. Additional pillars can be assessed for a supplementary half day cost.

- Reliability
- Operational excellence
- Performance efficiency
- Cost optimisation
- Security

Reporting

- Capture key findings and associated recommendations in a report

Assessment Closeout

- Prioritising and planning next steps for remediation
- Customer understands identified risks and recommendations
- Customer able to incorporate recommendations into implementation plans as backlog items

As one of the few aligned Microsoft Solution Partners in the UK and an Azure Expert MSP, Advania is ideally placed to engage Microsoft on our client's behalf to secure additional benefits through the Azure Migrate & Modernisation Program which can support the cost and accelerate the timetable of the overall project.
