Defender for Cloud Accelerator

ANS Think Bigger.

What is the Defender for Cloud Accelerator?

This Accelerator will enable you to accelerate your Cloud Security Posture Management and Workload Protection within your cloud environments at pace. Focused on the Microsoft security technology and best practice architecture, this Accelerator will create the foundation for you to fully adopt a SecOps process around protecting your apps, data and infrastructure at scale.

Who's it suitable for?

This solution is ideal for organisations who:

- ⊘ Are looking to utilise security posture management for their cloud environments

- ⊘ Want to modernise their cloud security tooling

- ⊘ Have a legacy security operational capability

- ⊘ Have poor security posture and threat protection

- ⊘ Want to evaluate the technology or deliver a PoC

What's an ANS Accelerator?

Accelerators are high-value, low-cost solutions which can be delivered in less than 6 weeks, making them ideal if you're on a tight deadline or want to evaluate the technology before making a significant investment.

What are the key benefits?

Using this Accelerator, you can reduce threats with AI and automation, and improve operational efficiency, helping your organisation do more with less.

01 **Support all your clouds**
On-board on premises resources with Azure Arc

02 **Improve your security posture**
Track and manage your security posture with Cloud Security Posture Management (CSPM)

03 **Access the latest features**
Take advantage of features and services at pace as it's available in Azure

04 **Gain advanced threat Intelligence**
Leverage industry leading threat intelligence with over 72T analysed signals per day

How will we deliver the Accelerator?

Our Accelerator process will follow four key steps:

1. Analyse
To kick things off, we'll start by analysing your requirements and priorities for a hybrid and multicloud cloud posture management and threat protection solution
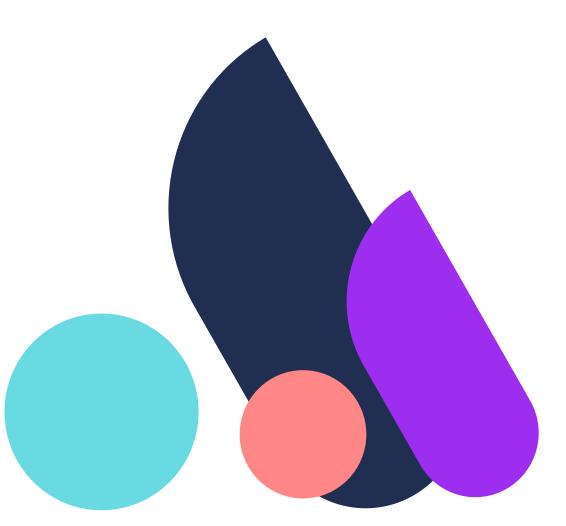

2. Define Scope and Deploy
Then we'll deploy Defender for Cloud and agreed defender plans into your production environment, onboarding servers, and other selected services.

3. Enable
We'll switch on the CSPM functionality within Defender for Cloud to defend your workloads

4. Deliver
The POC will then be delivered free of charge subject to supported and eligible funding

Why use an ANS Accelerator?

Rapid time to value
Depending upon if a landing zone is required, ANS can deliver this within 2-6 weeks.

Fully extendable
As well as easy to integrate with other services.

Proven Architecture
Provisioned with proven success and stable functionality

High touch project support
A dedicated project manager and short project kick off lead times will get your project off the ground quickly and smoothly
