Safe and reliable drilling & wells operations

ABOUT SITECOM®:

SiteCom® is a world leader in providing an effective industrial work surface that brings complex data together. Improving well construction and placement, with increased production and reduced costs.

See what customers are saying:

"In drilling, any unplanned stop implies a very high cost. But today we know what happens at the moment and we influence so that the best performance of the wells is constantly pursued, avoiding lost time due to non-optimized tasks or procedures"

– Renata Martins, Head of InWell Control Center at Repsol

WHAT WE OFFER

Imagine that all the enormous amount of data involved in your drilling and well operations from several providers, such as third-party DD, LWD, Well intervention, P&A, ESG data, Completions and mudlogging, could be efficiently integrated into one single interface. This is already a reality with SiteCom® – powered by Azure.

Through robust data aggregation and standardization, end-users can get immediate access and interact with real-time & historical data from anywhere at any time. This enables engineers and geologists to make decisions that mitigate operational risk, improve performance, and optimize drilling and well construction.

Lightweight, intuitive, flexible, and easy to connect.

In addition, the SiteCom® platform offers a series of applications that allow improved predictability and automation, thereby helping companies to optimize their energy production lifecycle.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
