Take control!

Simplify your financial management and keep growing.

Say goodbye to old ERP implementation methods and months-long projects. GoFinancials solution by Gestisoft offers you an implementation of the main accounting functionalities of Microsoft Dynamics 365 Business Central in 11 workshops.

Get the best ERP solution for SMEs quickly and ensure a return on investment thanks to a quick and agile implementation. Let yourself be guided by our financial experts to implement the best practices in financial management within an ERP.

Using Both our Heart and our Mind for your **Success.**

We know that the best results come from bold ideas. We appreciate what we do and we want you to too.

01 Preparation

The preparation stage includes launching the project and activating the application. This phase will allow you to be introduced to your solution through 101 training in addition to starting the manipulations through a test laboratory.

02 Missions

The configuration of your solution begins at this phase where the various financial processes will be implemented such as the budget and financial statements, the process of purchase and payment invoices, the process of sales invoices, deposits and immobilization.

03 Pilot

This phase will allow you to set up the data of your company in your new ERP solution. It is at this stage that you will perform user tests and that adjustments will be performed if necessary.

Take off with your new ERP software in **11 Missions.**

Take advantage of our expert advice for setting up financial management processes for the main functionalities of ERP software.

Our goal was to make ERP solutions accessible for our SMEs. GoFinancials allows us to get you up and running on the best ERP for SMEs only in few days.
