Sitecore Azure China Acceleration

The Sitecore Azure China Acceleration solution is your bridge to Azure in Mainland China. It reduces latency and provides faster personalized online experiences for your visitors in Asia.

What is Sitecore Azure China Acceleration?

A feature-rich scalable solution, designed to speed up Sitecore content delivery via Azure deployments in Mainland China.

Why do customers use the Sitecore Azure China Acceleration solution?

- Improves the online experience for Chinese visitors

- Fast to deploy and launch

- Flexibility of Sitecore deployment models

- Highly scalable

- Saves time and configuration effort when extended on Azure Blueprint for Sitecore

Boost your Sitecore Presence in China

- Deploy Sitecore CD node on Azure China

- Extend existing Sitecore installation on-prem or on Azure

- Boost static and and dynamic content delivery performance

Flexible, secure and fast-to-launch

Automated Environment Setup and Onboarding

- One day to deploy and launch

- Reduces configuration time, project risk and costs

- Dynamically preconfigured to take advantage of new SKUs

Low operational complexity saving time and reducing risks

Managed Reference Architecture

- Fully managed platform optimizing the infrastructure throughout the entire lifecycle

- Feature-rich and multilayered security foundation

- Focus on customers, not on the infrastructure

Continuously updated and optimized
