# Objectives

After this session, you should be able to:

- 01 Understand the basics of Windows 365
- 02 Know the key use-case scenarios and challenges that Windows 365 can solve in comparison with other VDI solutions
- 03 Identify potential business cases

**“With Windows 365 we created a completely new category, the Cloud PC, bringing the operating system to the cloud for the first time so you can stream the full Windows experience to any device.**

**You can think of it as a Windows computer with Azure computing.”**

- Satya Nadella,  
Chairman and CEO, Microsoft
