strategy dot zero

A digital platform for integrated planning & performance

Key Organisational Challenges

The key disciplines within the organisation are disconnected, complex and unsustainable

Operating Environment

Strategy & Business Planning

Portfolio, Program & Project Management

**Capability Management**

Risk Management

Governance

What is StrategyDotZero?

StrategyDotZero is a cloud-based enterprise platform that helps organisations take a systemic and collaborative approach to integrate planing and performance functions across the enterprise.

StrategyDotZero is built on a Strategy Execution framework that integrates key disciplines of governance and performance management across the organisation to realise the enterprise strategy.

The platform is already in use at some of the most significant Australian Federal and State Government agencies.
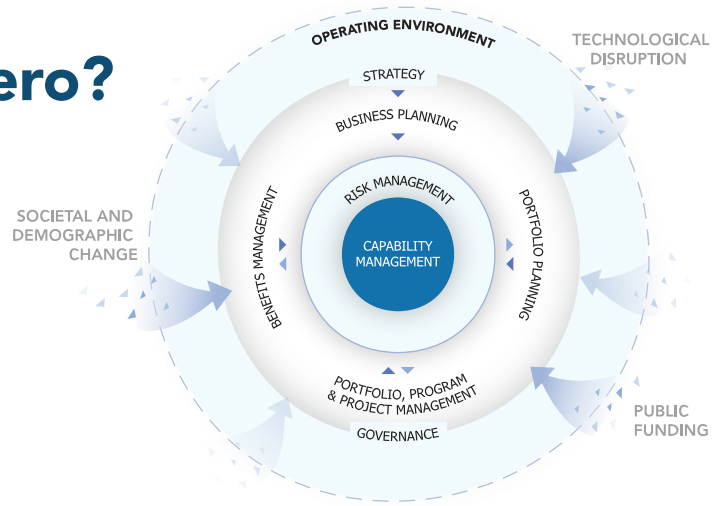

Strategy Execution Framework

Operating Environment

Scan the future horizon of the organisation and navigate the Service delivery landscape

Strategy & Business Planning

An integrated business planning and performance approach to enhance decision-making and future-proofing

Capability Management

Enhanced capability maturity and investment alignment to deliver departmental outcomes

Risk Management

Transparent risk management with the ability to analyse and manage interdependent enterprise and portfolio risks

Governance

Manage and track end to end decisions or actions across various governance forums

Portfolio, Program & Project Management

A value-driven approach to project planning and management by ensuring ongoing strategic alignment

How does StrategyDotZero help accelerate Enterprise Decision Making?

StrategyDotZero enables Executives to:
