

SAS and Microsoft: Analytics for Education

Make better decisions in the cloud.

SAS and Microsoft unite to empower education organizations to make better decisions with the best analytics on the most trusted cloud.

Education organizations struggle to manage, protect and govern data while modernizing legacy infrastructures and migrating data systems to the cloud. Integrating and connecting disparate data from across silos and agencies is essential for anticipating the future and responding proactively to changing trends in the dynamic world of education.

Better Together

SAS and Microsoft have joined together to help education institutions unlock the full value of their data to solve their toughest analytical challenges. With data management and analytic solutions built specifically for education and supported with industry expertise, SAS® Viya® on Microsoft Azure empowers education leaders to glean deeper insights to improve student outcomes, gain efficiencies, and reduce costs across the education continuum.

Leaders in Cloud Analytics

With five decades of analytics innovation and over a decade of cloud capabilities, SAS and Microsoft enable education organizations to get more done with a faster, more productive analytics and cloud platform. This means you can rapidly turn huge amounts of complex data into insights you can trust and use, and education leaders can now move from assumption-based to data-driven decisions.
