

Trading Made Smarter

Hone your trading skills, broaden your knowledge and verify your strategies with simulated stock trading platform

'Tomorrow's battle is won during today's practice', this is especially true with trading. Whether it's because you want to know more about picking stocks, or don't have the cash to trade yet or whether you want to test your investing strategies. This stock simulation platform lets you pick securities, trade and track results all without risking any money- doing all that and more on your mobile phone or pc.

The mock trading platform with provision of smart tools to help you make better investing decisions. Intelegain developed a progressive simulated stock trading platform; built in cloud infrastructure for wider reachability and equipped with smart AI chatbot that provides real-time stock prices and other information about trading.

Why customers use Intelegain's mock trading platform?

- Build simulated portfolio and run it the way pros do it
- Test drive new investment strategies and types
- Course and performance evaluation using this simulated stock trading platform
- Advance knowledge in trading and all areas of corporate finance
- Connect with traders worldwide online
- Entertainment as a skill-based game
