Modernize Your SDLC With VERA DevOps

More Than E-Signatures

Tx³

Vera
DevOps

Life sciences companies know they need to move beyond document-centric validation approaches. However, not all e-signature technologies are the same.

VERA DevOps is your one-stop, data-driven quality and compliance platform. Purpose-built to ensure FDA compliance with 21 CFR Part 11 and integrate seamlessly with best-in-class software, VERA does more than just enable electronic signatures – it provides streamlined workflow controls to support the use of Agile and test automation technologies within a regulated environment.

Discover VERA's unparalleled benefits for **COST EFFECTIVENESS**, **CONSISTENCY**, **COMPATIBILITY**, and **COMPLIANCE**.

COST EFFECTIVENESS
Reduce Licensing Costs and Shorten Development Timelines

- VERA reduces licensing and training costs by letting teams perform approval tasks from one common dashboard, without the need to log into multiple SDLC tools.

- VERA's common review and approval user interface and unified process across different platforms drastically reduce the risk of human error.

- VERA enables you to transition your SDLC from Waterfall to Agile, lowering the overall cost of compliance through more efficient methodologies and iterative processes.

CONSISTENCY
Standardize Workflows With Best Practices

- VERA serves as a system of record across your SDLC, eliminating the need to maintain multiple systems of record across disparate software quality tools

- VERA allows users to implement reusable approval policies that enable automated, repeatable workflows.

- VERA offers a common approval UI for your SDLC tools, freeing teams from the learning curves associated with managing multiple technologies.

COMPATIBILITY
Seamlessly Integrate With Best-in-Breed DevOps Tools

- VERA is compatible with a range of industry-standard technologies, including Atlassian Jira, Tricentis qTest, and Micro Focus ALM.

- VERA's exceptional compatibility and portability of data enables fast and seamless migration to new tool sets across the DevOps landscape.

- VERA is designed to allow versioning within Agile management tools such as Jira, enabling you to mitigate issues that arise when updating.

COMPLIANCE
Facilitate Continuous Compliance With 21 CFR Part 11

- VERA provides the technical controls and best practices to comply with 21 CFR Part 11, including data hashing to ensure data integrity across multiple systems.

- VERA provides traceability and audit history, giving you a system of record to address compliance issues and handle audits.

- VERA allows teams to seamlessly manage and execute compliance tasks as part of standard, repeatable workflows, eliminating disruptive and extraneous processes.
