LAVELLE NETWORKS

Accelerate Networks for the Digital Economy
Make Your WAN Safer, Faster and Simpler

Your Enterprise is racing to go Digital.
Don't let your WAN slow you down.

Digital transformation is all around your enterprise.
More applications, more cloud services.
Everyone wants IT to be as agile as possible.
But our networks have not changed in years.

LAVELLE NETWORKS

PROBLEM

Network is the Bottleneck

WAN is inadequate, slow, unsafe, and too rigid to access the diverse set of applications.

THE SOLUTION

Lavelle Networks solves the biggest challenges in the WAN for distributed enterprises. With 100% software defined architecture, ensure **Faster Network, Faster Scale**, **and the Fastest Transition to Cloud Networks.**

- ✓ Reduce operational WAN costs and total cost of ownership.
- ✓ Use the hybrid WAN strategy to reduce reliance on MPLS.
- ✓ Ensure readiness for cloud application performance.
- ✓ Take advantage of internet bandwidth with no compromise on internet security.
  ...and lot more

Lavelle Networks SD-WAN platform is a cloud-ready networking solution that connects users to applications, from any location to the data centre or the cloud.

▮ Flexibility of service provider at each branch

▮ Security with FIPS compliant encryption

▮ Centralized policy control

▮ Enhanced network performance with active link monitoring

▮ Dynamic QoS aware traffic steering

▮ Intuitive user interface and SDN gateways to connect all users, locations, and cloud networks with amazing levels of visibility in managing a 10-10000 node network with less than 4 operational steps.

LAVELLE NETWORKS

TRADITIONAL **WAN**		LAVELLE NETWORKS **SD-WAN**
MPLS	CONNECTIVITY	**MPLS/ILL/ Broadband/4G/LTE**
Low bandwidth	BANDWIDTH	**High bandwidth**
No Encryption	SECURITY	**AES-256 Encryption**
All apps in private data center	APPLICATIONS	**Apps spread across private data center Cloud & Saas**
Hub & Spoke connecting physical location	TOPOLOGY	**Network connects physical and virtual locations**
Expenses in data centers & at branches	COST	**Upto 60% savings**

LAVELLE NETWORKS SD-WAN SOLUTION SUITE

LAVELLE NETWORKS

CloudPort
WAN Edge

WAN Edge Gateway is available in physical form factor or as an "any cloud provider ready" virtual appliance. It is a next generation software defined solution, with uniform network experience across users, branch offices and data centers.

CloudStation
Network Orchestrator

Centralized control and command center, enables configuration management and monitoring of your entire WAN. You can use it as a SaaS, or run it in your private cloud.

It is the SDN controller of the entire network which constantly processes all the network control information to provide optimal forwarding performance in the entire WAN.

CLOUDSTATION EDITIONS

CloudStation Business

SD-WAN offered with CloudStation as-a-service and complete ticket based administration using our industry leading "Network-Assist" program (This program continues to receive high NPS scores from our customers)

CloudStation Pro

SD-WAN offered as NaaS on customer premise cloud, requirement based expandable storage, role-based network administration, DC/DR across geography or hybrid cloud and more

CloudStation Provider

Provision multiple tenants, get advanced network monitoring, high availability and advanced WAN services, 3rd party integration, advanced reporting and more.

Your network needs to reduce reliance on legacy technologies and prepare for innovative WAN solutions.

Lavelle Networks SD-WAN is 100% cloud ready! We recommend solutions that work best for your organization's unique requirements.

LAVELLE NETWORKS

KEY FEATURES

"Software defined WAN solutions for distributed enterprises with a large number of branches or locations at breakthrough economics"

- » Automated network control
- » Flow level network monitoring no matter how large your network
- » Application visibility at SaaS economics
- » Bundled network security (Firewall & Web Filtering)
- » Policy based network routing
- » Proven network stability - ScaleAOn architecture
- » Interoperability with your MPLS network. 100% hybrid WAN support

*Download datasheet for a complete list of CloudStation features.

Simple to Deploy
Plug 'n' Play branch office deployment

Provides Secure Scalable Network
AES-256 Encryption with dynamic tunneling for your app traffic. No public IP at remote offices. Stateful firewall and URL filtering at the branch

Ensure App Performance
Prioritize enterprise apps on the network. Direct & controlled internet access for enterprise SaaS apps

Cloud based Centralized Management
Scale in the cloud provides deep visiblity + insight

Makes Cloud look like a Branch
Seamlessly extends corporate policies and enforcement to the cloud (AWS and Azure)

Saves Costs
Decreases your WAN budget with reduced use of expensive MPLS circuits

LAVELLE NETWORKS

- 2000 node deployment in 2 weeks.
- Large e-commerce networks.
- Top insurance providers.
- Large retail networks.
- Top rated financial institutions, government networks, law and order, healthcare.

Top Global Enterprise Brands are using Lavelle Networks's SD-WAN Platform for upgrading their infrastructure to next generation WAN and hybrid WAN solutions.
