

b+ dgtalDocumentConnector

SAP & Sharepoint integration

Gerardo Volf
Gerardo.Volf@techedgegroup.com

Challenges

- SAP does not support Sharepoint as Content Server
- High TCO
- Long Time-to-Value
- Not possible to select where each document type is stored

Opportunity

- Link SAP business objects with your documents, stored in your Sharepoint
- Lower your TCO by using what you already have
- Increase the satisfaction of your business users

b+ digitalDocumentConnector

Main features and benefits

- Metadata synchronization (SAP business object and documents)
- Multi-language
- Easy to install / Easy to configure
- No AddOns are required in your Sharepoint
- Full audit in SAP (read and write actions in the Application Log)
- Document crawler
- Compatible with FIORI

Inspiring Trust. Globally.
