Airline Crew Analytics

Analytics that helps airline managers and crew
live healthier, happier and more balanced lives

Crew management is an extremely complex process, where analytics and machine learning can make a positive tangible difference reducing cost, fatigue and crew dissatisfaction.

Self-Service Analytics via Web UI
Transparency & Collaboration

Seamless access to data derived insights via web-UI, so teams can work together towards collective goals and track progress.

Analytics and Machine Learning
Insight & Automation

Use analytics and machine learning to discover hidden patterns, enable break-down and automate hard tasks like pairing.

Data Processing Architecture
Data Preparation & Virtualization

A tool-agnostic, automated data processing architecture enables the ability to gain holistic insights and effective algorithms.

Build on best practices
Safe, Secure & Private

By actively working with Azure we ensure tech and policies that uphold the highest standards of data privacy and security.
